"NORMA"
PRECISION
BALL BEARINGS
(PATENTED)

The unfailing start at the touch of the button—the surge of silent power as the engine takes hold—the sure, swift acceleration—the feel of ample energy in reserve—that confidence in an electrical system always ready and always adequate—these are the things, whether in car, truck, tractor or power boat, that mark the machine of quality and serviceability.

It can be no mere accident that the machines which most uniformly render such service as above defined, are—almost without exception—fitted with magnetos and lighting generators carrying "NORMA" Bearings.

Be SURE. See that Your Electrical Apparatus is "NORMA" Equipped.

# New York's Twentieth National Automobile Show

## All Indications Point to Its Being a Record Breaker; Eighty-Three Makes of Passenger Cars and Two-Hundred Twenty-Seven Kinds of Accessories to Be Exhibited

WITH all available space taken by leading manufacturers of the industry, New York's Twentieth National Automobile Show, to be held January 3d to 10th under the auspices of the National Automobile Chamber of Commerce, promises to be the most unusual in the history of the motor car industry. First of all it is to be a "double header." At the same time that passenger cars are being shown on four floors of Grand Central Palace, the exposition of commercial vehicles will be held in the Eighth Coast Artillery Armory, Jerome avenue and 193d street, which has a floor space of 150,000 square feet. This is the first time that the passenger car and motor truck shows have been held simultaneously and it is an interesting sidelight upon the rise in prominence of the commercial car.

There will be 83 different makes of passenger cars on exhibit at the Palace: Allen, American Beauty, Anderson, Apperson, Auburn, Biddle, Briscoe, Buick, Cadillac, Case, Chalmers, Chandler, Chevrolet, Cole, Columbia, Comet, Commonwealth, Crow-Elkhart, Davis, Detroit-Electric, Dixie Flyer, Dodge Bros., Dorris, Dort, Elcar, Elgin, Fiat, Franklin, Grant, Haynes, Hollier, Hudson, Hupmobile, Jackson, Jordan, King, Kissel Kar, Kline Kar (N. Y.), Lexington, Liberty, McFarlan, Maibohm, Marmon, Maxwell, Mercer, Metz, Milburn Electric, Mitchell, Moline-Knight, Monitor, Moon, Nash, National, Oakland, Oldsmobile, Olympian, Overland, Owen-Magnetic, Packard, Paige, Paterson, Peerless, Pierce-Arrow, Premier, Reo, Roamer, Saxon, Sayers, Scripps-Booth, Standard, Stanley, Stearns-Knight, Stephens-Six, Stevens-Duryea, Studebaker, Stutz, Velie, Westcott, Willys-Knight, Winton, Holmes, Templar, Cleveland.

Two hundred twenty-seven kinds of accessories for use with passenger cars will be shown.

Because of the need for conserving time, the whole country is buying automobiles, thus offsetting the poor service which is being given by trolley lines and the railroads.

Many dealers are finding it difficult to meet the demand for cars because, notwithstanding the great strides that the industry has been making during the past few months, it is estimated that motor car production this year will not exceed 1,600,000 vehicles. This is due to the small number produced during the months following the signing of the armistice, according to Alfred Reeves, general manager of the National Automhobile Chamber of Commerce, who recently returned from a trip among the factories in Michigan and Indiana. Present production is at the rate of approximately 2,000,000 vehicles a year, which was about the 1917 average. This includes both passenger cars and trucks, the latter figuring about 12 per cent. of the total number.

Radical changes in the type of cars exhibited at the Show will be few. Almost all the manufacturers will have some new things to offer but they will be largely in the line of refinements especially in body design. Even in body design the differences will be largely matters of detail—changes in smaller items of equipment. Interest in accessories will be keen as usual. These seemingly insignificant additions to a car add considerably to the comfort of owners who are always on the lookout for improvements.

Comparable with awakened interest in motor trucks is the increasing demand in the passenger car line for busses for use in cities where car service is poor. For all round use the closed car is of course the most practical and it is symptomatic of the rock-bottom basis upon which the automotive industry is grounded in public esteem that the demand for closed cars exceeds the supply.

That the American motor car has passed with flying colors the severe tests of war-time, and the confused reconstruction period is clear from the fact that foreign makers are studying it seriously.

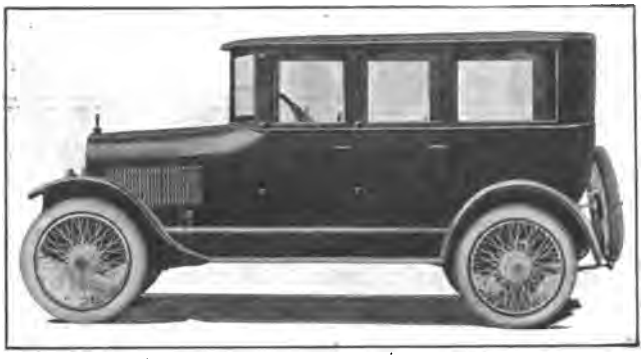
# Many Attractive Closed Cars Offered for 1920

## Improved Lines and More Luxurious Appointments Found in This Year's Models

TO meet the increased demand for closed cars, nearly all manufacturers are offering closed models having improved lines and more luxurious appointments. Some of the newest and most attractive



CROW-ELKHART SEDAN

offerings are shown in the accompanying illustrations.

NEW CROW-ELKHART SEDAN

The latest tendencies of closed car construction are reflected in the new Crow-Elkhart Sedan, just brought out by the Crow Motor Car Co., Elkhart, Ind. In design the Sedan is rather daring, although the freakish has been carefully avoided. The lines are long and unbroken, the driver's compartment is V-shaped with a corresponding V-type windshield, which affords the widest vision. The top is straight and flat, the windows are wide and

LIBERTY COUPE

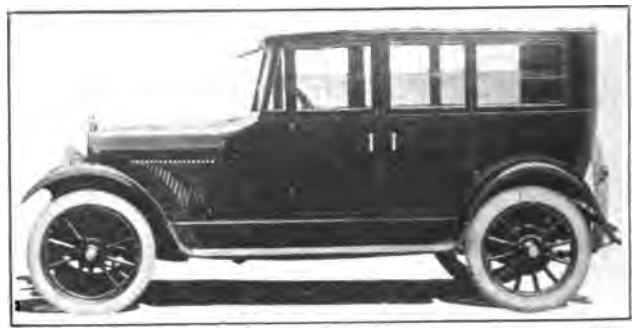
equipped with rattle-proof lowering devices, the doors are square and wide-opening, the running board is conveniently low. The seats are pitched at the correct angle, and covered with heavy whipcord. The rugging is thick napped and soft, there is a cut-glass dome light, small step-light at the right rear door, out-of-sight heater, vanity case, smoking set, silk curtains, and many other refinements. This body is mounted on the company's standard six-cylinder chassis.

NEW LIBERTY CLOSED CARS SHOW DESIGNER'S SKILL

Refinements in design give added beauty to the 1920 line of Liberty closed cars offered by the Liberty Motor Car Co., Detroit.

The line consists, as heretofore, of a sedan, coupe and brougham. While in every case their construction shows considerable betterment, chiefly in body design, the prices on two models, the sedan and coupe, have actually been reduced.

Of the three models, the greater change is noticed in the sedan. This car has been given the slanting windshield by projecting the lower part of the windshield frame a few inches forward, similar to the method employed first on the coupe. This improvement adds some space to the front compartment. And, as is true in all windshields when the slant of the glass is correct, it prevents glare from



"LEX-SEDAN"

being thrown into the driver's eyes. It also allows the driver a better view at either side through the inverted V-shaped glass, which connects the windshield with the body proper.

The car is of the four-door type, a design which makes possible more substantial body construction, and has the added advantage of permitting independent entrance into either compartment.

The buyer is permitted to choose the upholstery he prefers from three different shades of broadcloth, which are matched by three different exterior colors.

LIBERTY SEDAN

The silk window shades are of an agreeable color, and the fittings are finished in nickel and ebony.

All windows can be lowered into the body, or the doors, with the single exception of the window at the rear. Thus the full enjoyment of summer driv-

Digitized by Google

ing is always available, yet it requires but a moment to obtain complete protection when the weather threatens.

Still further provision for the owner's comfort during the winter months is furnished by a Perfection heater, by means of which the car is heated through the engine exhaust.

The windshield is of the rain-vision, ventilating type. Above it is a rear-view mirror.

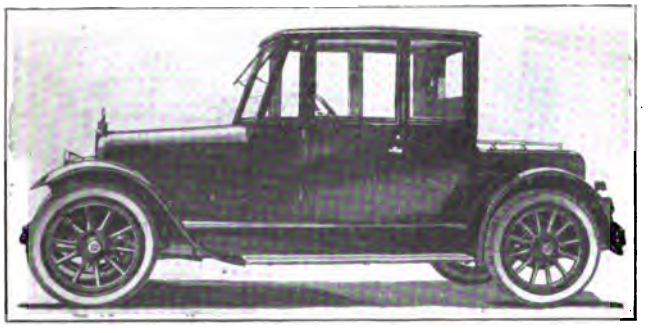
LEXINGTON SEDAN HAS BODY DESIGNED TO FIT TOP

In designing its latest closed-car creation, the Lex-Sedan, the Lexington Motor Co. of Connersville, Ind., has reversed a practice long adhered to in the motor coach building industry.

CHANDLER LIMOUSINE

Instead of building the top to fit the body of the car, Lexington, in its new all-season model, has built the body to conform to the top. This innovation in coach design has given the car a harmonious effect not found in previous models. It has the appearance of being constructed as a single unit, a fact that lends it distinctiveness.

Mounted upon a Lexington Minute-Man Six chassis, the Lex-Sedan possesses an all-season value which is bound to be highly appreciated by motorists. It is of the new four-door type, with high sides. There are six side windows, square in shape and of equal size. The glass in all of these may be low-



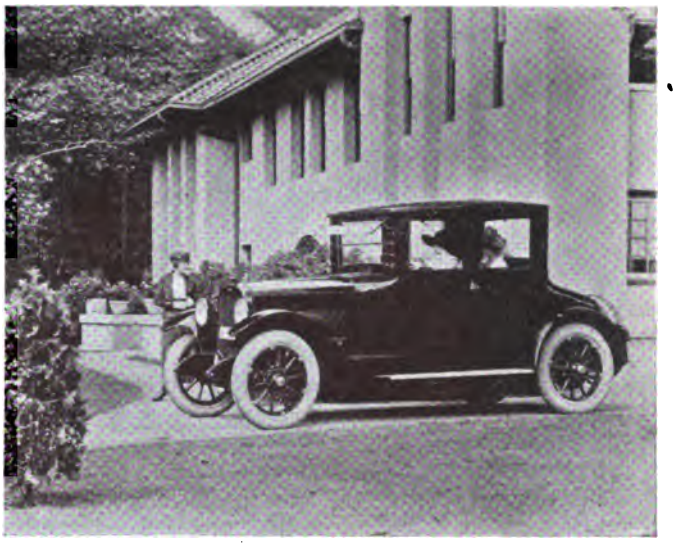
TEMPLAR COUPE

ered or raised to conform to the weather or the will of the occupants.

The coach work, furnishings and color combinations are described as being as distinctive as the car itself. Three colors are optional—blue, maroon and Brewster green, with Spanish leather and velour to match.

CHANDLER OFFERS THREE CLOSED MODELS

Three closed models are offered by the Chandler Motor Car Co. for 1920. There are a seven-passen-



CHANDLER COUPE

ger limousine, seven passenger sedan and four-passenger coupe. They are mounted on the standard Chandler six-cylinder chassis. The seven-passenger models are exceptionally roomy and well appointed.

An artistic mahogany panel is placed on the doors and on the front of the tonneau immediately under the heavy plate glass windows; mahogany toilet and smoking cases are placed within easy reach from the rear seat; and the attractive autophone transmitter is concealed—though readily accessible—in a pocket in the side of the body.

There are dome, reading and automatic step lights, and all windows are adjustable.

STEPHENS COUPE

In the sedan the front seat is undivided, extendinf solidly from side to side, and the four large doors offer easy access to either the front or rear.

The seating arrangement in the coupe is staggered, the driver's seat being somewhat forward of the wide rear seat. An auxiliary chair, with spring cushion seat, is placed alongside the driver and folds away when not in use.

STEPHENS CLOSED MODELS

In the new Stephens sedan a neat, half-oval moulding runs entirely around the body, belting it and cleverly separating the deep rich blue of the lower part of the body from the black of the upper part. Flush, tight-fitting doors, square-finished and fitted with neat exterior door handles add to the beauty

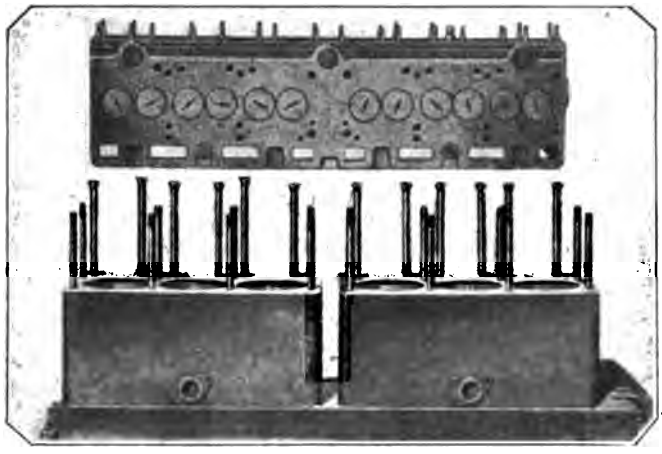
# Cars for 1920 Show Refinements in Design

## Few Radical Changes But Many Minor Improvements Which Make for Accessibility and Efficiency—Engineers Giving More Attention to Heat Transference and Expansion and Contraction

*By EDWARD G. INGRAM*

WHILE there are few radical mechanical changes in the design of 1920 passenger cars, there are many minor improvements which make for accessibility, efficiency and lower upkeep.

The development of aircraft engines which must run most of the time at nearly maximum power has brought to the attention of engineers the fact that many engine failures are due to lack of sufficient attention to the question of heat transference and expansion and contraction. In the case of the piston,



SHOWING HOW NEW MARMON CYLINDERS ARE CONSTRUCTED

for example, heat is received by the head at a rapid rate and the only way it can get away is through the skirt to the water-cooled cylinder walls. This calls for a thick head made of material which will conduct the heat away rapidly. The skirt of the piston, on the other hand, should be made of a material that will expand and contract in the same way as the cylinder in order to keep the proper clearance. The problem is a difficult one and how one manufacturer endeavors to meet it will be explained later. The importance of maintaining unbroken oil films in the bearings is also receiving more attention and there is a tendency towards the increased use of full force feed lubrication. The problem of handling low grade fuel to better advantage is still being worked on but no really new ideas appear to have been developed.

Some interesting changes of a more radical nature than usual are found in the new series Marmon 34. While aluminum is still extensively employed in this car, the cylinders are no longer made of this material. The cylinder barrels are now made of gray iron, cast in two units of three, with the water jackets integral. These cast-iron cylinder blocks, which are of very compact design, are capped by the cylinder head. Studs screwed into the crankcase project through the cylinder blocks and header, holding the units firmly. This design makes for extreme accessibility, for after the cylinder head units are removed and the head taken off, the cylinder blocks can be taken off of the crankcase giving immediate access to the pistons.

Another feature of this engine is the two-piece aluminum and iron piston. The piston has an aluminum head and center structure for holding the wrist pin, and a cast iron skirt. The aluminum head gives lightness and rapid heat conductivity and the cast iron skirt expands uniformly with the cylinder walls, thus preventing piston slaps and reducing the tendency for oil to pass up into the combustion chamber.

Another point where the Marmon engineers have given serious attention to expansion and contraction is in the bearings. Here cast iron is used instead of bronze to back the white metal. It is stated that since bronze expands and contracts more rapidly than steel or iron, bronze caps are apt to pinch the shaft in cold weather, giving a stiff engine.

Yet another novel feature of the bearings is that no shims are used. The company states that it has found that shims act as a combination dam and sluice gate by which the life-saving oil film is broken and let out of the bearings.

The crankshaft of this car is now provided with but three bearings and is of very substantial construction. A considerable portion of the center of the shaft is drilled out for lightness and to provide for force feed lubrication to all bearings. The brake horsepower of the engine has been increased to about 80 without any change in the cylinder size. The car is now provided with a disk clutch instead of the cone type formerly used.

The National Sextett is one of the few entirely

TWO-PIECE ALUMINUM AND CAST-IRON PISTONS USED OF MARMON

new models which will be exhibited at the New York show this year. The car is powered with a six-cylinder 3½ by 5¼ inch engine developing 71 horsepower at 2600 r.p.m. Overhead valves are used for the first time by the National Company, these being operated by push rods.

A feature of this engine is that the left side of

Digitized by Google

cylinder block is cast with the push rod cham- open. A pressed aluminum cover is provided lose this chamber. Compared with the design re the push rods run through passages in the ıder block, the National construction possesses ıdvantages of lightness and accessibility.

ɜ in the case of the Marmon, double valve ıgs are used on this car to eliminate periodic ıtion and prevent the valve from dropping into cylinder in case one spring breaks. The valve ets are hollow like inverted steel pistons and valve push rods are mushroom shaped and set le of the tappets. The upper ends of the push are capped to receive the spherical ends of the e rockers. These oil refining cups ensure quiet atioin.

ıe valve rockers are mounted on two hollow ts, six on each, and spring spacers hold them osition. This permits the rockers to be pushed ɜ so the push rods can be removed when neces-

stead of adjusting the valves by raising or low- ɜ the rocker arm bearings, as is done by Mar- , National provides an adjustment at the push end or the rocker arms.

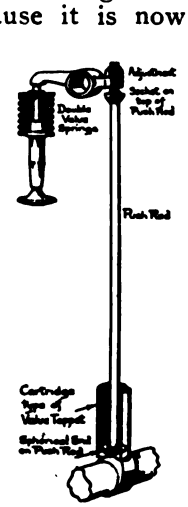
ıe valves are large, the clear diameter being tly greater than the bore of the cylinders and the ⅜ in. The crankshaft is provided with three ı bearings and force feel lubrication is used. camshaft is driven by a Morse silent chain with ɜcentric on the generator drive gear. It is stated ɜngine weighs 750 pounds.

ıe single dry plate clutch and three-speed trans- ion are in a unit with the engine. A one-cylin- tire pump is mounted on the gearset. The car ɜs through the long semi-elliptic rear springs he torque is taken by an arm which is attached e center cross member of the frame. The wheels wood with 32 by 4¼ inch tires. The car has a ɜlbase of 130 inches.

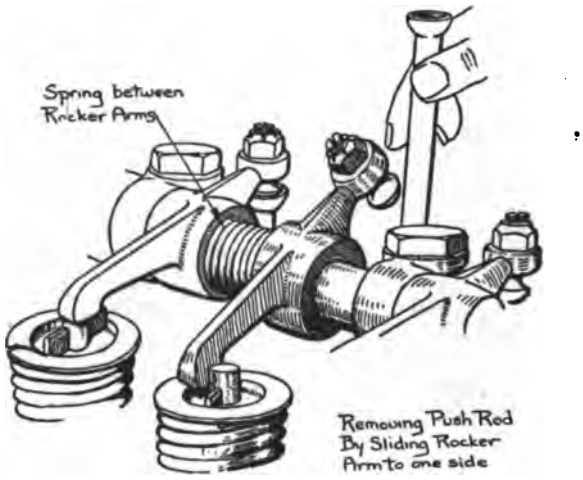
ıe Overland Four with its "three-point canti- " springs will undoubtedly attract even greater ds at the show this year because it is now y in production. This car was ribed in the last issue of MOTOR ORD.

ıe new Grant-Six has a longer ɜlbase and semi-elliptic rear ıgs which are said to be the long- ɜf any used on a car of this size. wheelbase is 116 inches and the springs are 56 inches long and 2 ɜs wide. The front springs are ıches long and 2 inches wide. The has long, low, straight lines h blend into the hood at the front. engine has a wider power range formerly.

ɔtable among the improvements ıe Cole-Eight is the one-piece ing of the new rear axle. It is d that recent tests made at Cor- University showed this housing e 200 per cent. stronger than wo-piece type. The axle is so designed that no e or oil cups are required. A large inspection renders the interior mechanism accessible. The ɜs of the full-floating flange drive type, underslung attachment and the drive is through the springs. tallic bumpers have been substituted for the ɜr bumpers, and instead of being attached to the frame to protect the housing and brake shafts from coming in contact with the frame when severe bumps are struck, are fitted on top of the rear spring seat. The metal bumpers are substantial enough to sustain the most severe jolt and prevent any injury to the brake shafts and housing, and once installed, are permanent.



NATIONAL VALVE MECHANISM



SHOWING HOW VALVE ROCKERS OF NATIONAL ARE HELD IN POSITION BY SPRINGS

### Hackett Motor to Reorganize

The stockholders of the Hackett Motor Car Co., Grand Rapids, Mich., will vote soon on a plan for reorganization of the company under the laws of Delaware the new plan contemplating a capitalization of $1,500,000 preferred stock of the par value of $10 and 300,000 shares of no par common stock. The outstanding shares in the present company will be exchanged on the basis of one share of preferred stock for each three shares in the old company, together with one share of common stock in the new company for each share in the present corporation.

### Remmel Mfg. Co. Incorporated

The gas engine and power farm machinery manufacturing business conducted for many years at Kewaskum, Wis., by Nicholas Remmel has been incorporated with a capital stock of $50,000 as the Remmel Mfg. Co. The foundry and machine shop will be enlarged and several new lines of products put into production during the winter. The incorporators are Nicholas Remmel, Otto E. Lay, B. H. Rosenheimer and George H. Schmidt.

### New Factory Started

Work on the new factory of the Bollstrom Motors Co., St. Louis, Mich., will start at once. This is a new company organized to manufacture a four-wheel drive truck. The first factory unit will be 60 x 304 ft., one story high, and will be built of brick and concrete.

### New Mechanical Building for Firestone

Permit for the construction of a mechanical building, which is to be the latest addition to the factories of the Firestone Tire & Rubber Co., was issued recently at Akron, and ground has already been broken on a site of Firestone plant number two.

The building will be three stories high and is designed to accommodate the electrical, machine, pipe, carpenter, pattern and tin shops.

### Nine Cole Models Offered

Nine models compose the Cole Aero-Eight line offered by the Cole Motor Car Co., Indianapolis, Ind. These are the Tourster, a seven-passenger touring car; the Aero-Eight roadster, carrying two passengers; the Sportster, carrying four passengers; the Sportsedan, a four-passenger closed car; the Sportosine, a six-passenger closed car; the Sportscoupe, a three-passenger coupe; the Tourosine, a seven-passenger limousine; the Toursedan, a seven-passenger sedan; and the Aero-Eight Towncar.

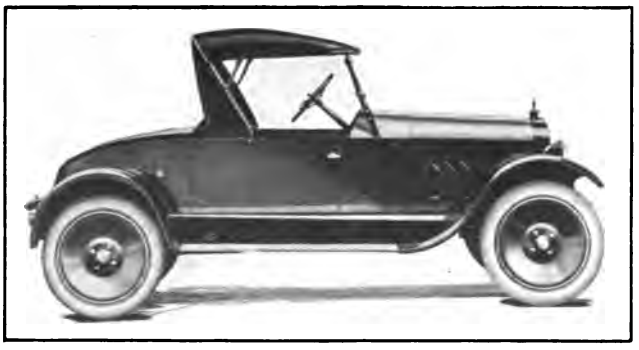
COLE "SPORTSEDAN"

All models are built on the standard eight-cylinder chassis. The large variety of closed models is offered to meet the increased demand for cars that can be used the year round with comfort.

The Sportsedan shown in the accompanying illustration is a particularly attractive four-door model in which the rear quarter sections are solid and have octagonal windows. The Sportosine is designed to combine the dignity and comfort of a toy limousine with that of a diminutive sedan. It is distinctly a sport car and the adjustable glass partition between the front and rear compartments is a novel addition.

### Columbia Three-Passenger Roadster

In the accompanying illustration is shown the new Columbia Six three-passenger roadster. This roadster body is mounted on the standard chassis built by the Columbia Motors Co., Detroit. A distinctive feature is the counter-sunk well in the rear deck, in which the tire is carried. The well is deep enough so that from a side view the tire does not show at all. This gives the lines of the car a clean, unbroken appearance.



COLUMBIA ROADSTER

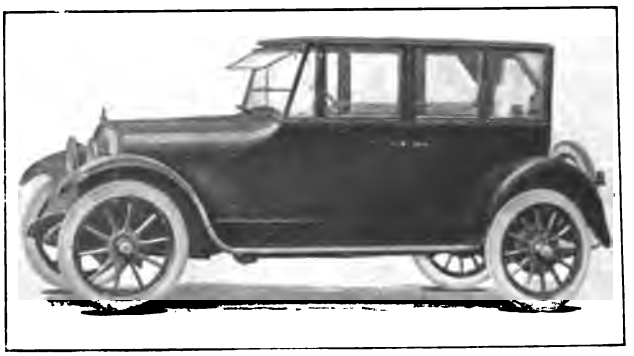
H. F. Harris has been appointed general manager of the Bethlehem Motors Corp., Allentown, Pa. Mr. Harris for the past two years has been with the Republic Motor Truck Co.

### Janesville Firms Are Consolidated

The final step in the consolidation of the Janesville Machine Co. with the Samson Tractor Co. was effected recently when the executive departments of the two concerns were merged in the new general office building of the Samson works at Janesville, Wis. When General Motors determined to locate its main tractor plant in Janesville it acquired the Janesville Machine Co., manufacturer of farm machinery, to serve as a source of supply of units for combination with tractors. J. A. Craig, president of the farm machinery concern, was made president and general manager of the Samson organization.

### New Series Lexington Models

Lexington Motor Company of Connersville, Ind., comes to the fore this year with a new series of Minute Man Six models.

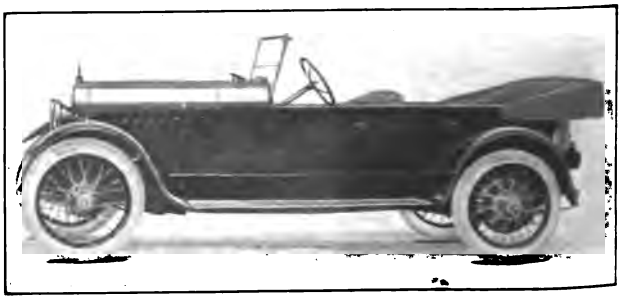


"LEX-SEDANETTE"

The Series "S" models all are mounted on the "Thoroughbred" chassis which embodies some exclusive features. For instance, the frame is a single unit. With this construction, more than 100 parts are eliminated making not only for lighter weight but providing a more sturdy, better balanced construction that eliminates squeaks and rattles, it is claimed.

Other features of the chassis are the one-finger emergency brake, and the cable (foot) brake, which does away with rigid brake rods that are apt to rattle and assures an even pull on both brakes. Engine features include the Moore multiple exhaust which has been used by Lexington for some time, and the Lexi-gasifier, designed to overcome difficulties experienced with the present low-test gasoline.

In addition to the touring, sedan and coupe models the company offers the "Lex-Sedanette," a distinctly new four-door, four-passenger all season car, and the "Thorobred" sport model, which is lower than the touring car with rakish lines.



LEXINGTON SPORT MODEL

Specifications of the Lexington chassis include a 3¼ x 4½ in. Continental Red Seal engine, dry disk clutch, three speed glasset semi-elliptic springs and a wheelbase of 122 inches.

KE a good many other things connected with automobile design and construction, there has been diversity of opinion regarding the best locaor the gasoline tank. At first the gasoline tank )laced under the front seat. This location perd of gravity feed to the carburetor but had the vantage of necessitating the occupants of the seat getting out every time the tank had to be

For this reason this location has been aban- l by most makers and the tank placed either at :ar of the chassis or under the cowl.

e locating of the tank under the cowl also has dvantage of permitting of gravity feed, but the )f the tank is somewhat restricted and in case accident or a leak in the tank there is some :r of the gasoline taking fire and burning the )ants of the front seat.

:wed from all angles it would appear that the location is the best. This location, of course, sitates pressure or vacuum feed, and being more ;ed the tank is apt to be dented by even slight :nd collisions. The vacuum system of feed, ver, appears to be very reliable, and some rs are now protecting the tanks by cross mem- so that there is less danger of them becoming ged.

other location for the gasoline tank which does ppear to have been tried is under the rear seat. this location a filler pipe could be run through ack of the car so that the tank could be filled without disturbing the occupants. In this location the tank would not be likely to be damaged.

HOW Canadian farmers are taking to the use of motor cars is shown by the following news item from Toronto:

"Farmers are coming into their own in Ontario in so far as the possession of motor cars is concerned. During the last five years the increase in the number of cars owned by farmers has been unprecedented in Canada. Statistics of the Ontario department of highways for last year testify to the many farmers who are replacing the horse with the motor car for utility and pleasure.

"The report of the department shows that of 101,599 passenger cars owned in the province last year, 64,900 of them were owned in towns, villages and townships, and only 36,699 in the cities. Of the number owned in cities less than half were in Toronto, or 17,171. The registration totaled 109,374 cars in the province, including 7,529 motor trucks. There was an increase of 25,584 in the number of cars of all kinds registered in the province in 1918 over the previous year. It is also interesting to note, in an analysis of the occupations of the owners, that 37,758 are farmers and drovers, which exceeds the number owned by any other class."

PISTON design has undergone rapid development during the past few years. There are few parts of the internal combustion engine which have presented so many problems for the designer to overcome as the piston.

The piston is subjected to heavy stresses and high temperatures, yet it must be made very light in order to reduce vibration and bearing loads to a minimum.

A great deal more attention is now being given to the question of heat dissipation than formerly, and this is assisting materially in the development of better, more reliable pistons.

Heat is received by the head of the piston at a rapid rate and the only way this can be dissipated is by passing down through the skirt to the cylinder walls where it will be carried away by the cooling water. Owing to the fact that little heat will flow through the rings, which are floating members, it has been found desirable to increase the thickness of metal behind the ring grooves so that there will be no obstruction to the flow of heat down the skirt. It has also been found advantageous to make the piston head rather thick. These features are incorporated in the pistons used on the Liberty engine.

Since it is clear that most of the heat must pass from the head through the skirt of the piston it would appear to be bad practice to cut away much of the skirt such as is often done in the case of racing car engines.

A REMARKABLE illustration of what can be done with the modern touring car is found in the performance of a six-cylinder Delage car, which recently was driven by Louis Delage from Paris to Nice, a distance of 621 miles, at an average speed of 41.53 m. p. h. The greatest distance covered in one hour was 49.7 miles. The actual time for the trip was 15 hours, 55 minutes, this including stops totaling 58 minutes. When consideration of the fact that this trip was made over ordinary country roads, and without advance preparation is given, it appears that no better proof of the wonderful advancement in automobile design during the past few years could be found.

# The Son's Reason

Young men, also, like the Columbia Six.

Some of the best known sportsmen in the country drive it. There's a thorough-bred, high-spirited look of action, sturdiness and power to it. The Columbia Six appeals to the young man with red blood in his veins.

You will seldom find a car that pleases the young man in every respect and still pleases other members of the family the way the Columbia Six does.

A Columbia Sales contract is a sure way of building a profitable, increasing and permanent business.

# This Line-Straight-Helps Keep Your Truck Out of the Shop

BROWN-LIPE GEAR TRANSMISSIONS

IT shows that furnace 47 — Heat-treating gears for **your** truck—was kept at an **absolutely** even temperature. And the pyrometer readings were taken every 5 minutes.

This extreme care found in every operation and every inspection throughout the entire process of manufacture is to make your Truck's (or Motor Car's) transmission or differential "above suspicion."

**BROWN-LIPE-CHAPIN CO.**

# 12 more

To the list of automobile manufacturers using Westinghouse electrical equipment on their cars and trucks—more than twice as many as use any other make—twelve names have been added within the past few months.

These manufacturers, like the others who preceded them, have adopted Westinghouse Auto Equipment, though it costs a little more, because they know the quality, the engineering service and the name it bears make it worth a great deal more.

WESTINGHOUSE ELECTRIC & MANUFACTURING COMPANY
*Automobile Equipment Department*
*General Sales Office*, New York City: 110-114 West 42nd St.
*Works*, Newark, N. J., and Springfield, Mass.

THE danger of the high prices of accessories causing a price-cutting era is discussed in the *Automobile Trade Journal,* as follows:

It is believed by many that the prices of a large number of accessories and automobile articles have gone just about as high as they can go. Nothing is indispensable, and it may be that some of these goods will not move as they should.

Raising of prices has become a sort of habit, and there is no question but what certain goods have been raised merely because it was believed the trade would pay the additional price, because everything else had gone up.

There must inevitably be a reaction. The pendulum is going to swing the other way. Irresponsible dealers in automobile accessories and parts are going to come into the market with goods at lower prices. The legitimate dealers are going to have their business cut from under them by an era of price cutting unless prices are very rapidly brought to a normal figure, which means the lowest point at which they can be sold commensurate with a living profit.

As a sign of the times it may be quoted that in lines outside of the automobile business, certain retailers are actually advertising the profit margin on several of their best selling items to establish confidence on the part of the buying public. This is not advisable, nor is it a practice we can commend. This, however, is taken as an indication that the price levels have reached practically their high mark, and that from now on there will be a tendency for the return of the price cutting evils which have disrupted the trade in the past.

It would seem advisable for accessory retailers to go over their stocks as carefully as possible, and put prices on them which will prevent possibility of irresponsible dealers coming in and taking the business from them.

---

UNDER the title of "Better Equipment Means Better Service," the following editorial appeared in a recent issue of *Motor Age:*

That the accessory industry is taking considerable interests in the time saving service equipment is evidenced by the unusual amount of it displayed at the show of the Automotive Equipment Association last week. A real field exists for this sort of equipment and, thanks to the manuacturer, good progress is being made in the development of new forms of tools.

Perhaps the demand for better service equipment has been accelerated by the more progressive service stations which are always on the alert for some new method of improving their service. Car operators are responsible directly for the present status of affairs. The motor car is primarily a business vehicle and as such demands business methods in service and in its service equipment.

The major feature of the new service equipment is that it is designed to increase the productiveness of mechanics.

It all tends for an improvement in the quality of work and incorporating such things as will enable a considerable saving in time consumed for repair and service operations.

Manufacturers may well investigate some of the equipment which the better class of service stations have devised to meet their own conditions. The thought expressed by many of these specially designed machines is basic for certain classes of repair operations. Many of these good shops have tools which will apply equally well to other shops. But to get these ideas spread broadcast so that service in general can profit from them is one of the problems. A survey of conditions will save manufacturers much experimental work and expense if they will only take advantage of the other fellow's experience.

---

DRIVEWAYS are practically inevitable this winter and preparation should be started at once to make ready for them, in the opinion of the *Automobile Trade Journal,* which says:

Repeated warnings are appearing in the daily papers to the effect that the railroad transportation system of the country is going to prove totally inadequate to handle the heavy demands that will be made upon it during the coming winter. Movements of coal, grain and many other essential commodities will be just as heavy as they were last winter, and there have been no substantial additions to the equipment of the railroads either in trackage or rolling stock to enable them to handle the increased business effectively.

Another factor which must not be overlooked is that we can hardly look for another winter as mild and open as last season was. Labor troubles also may develop, in spite of all efforts to forestall them. It is quite possible, therefore, that railroad transportation difficulties this coming winter may be even worse than last year.

There is one bright ray of hope in the situation, however, and that is that due to the experience last year, we all know pretty well what to expect, and so if we make proper use of the knowledge gained

Digitized by Google

through necessity last winter, the situation should not be so bad after all.

To automobile dealers all this means that driveways are practically inevitable this coming winter, if deliveries of cars are to be obtained from the factories. Every preparation should be made at once, therefore, to make ready for drive-aways during the coming months.

One of the important things which requires immediate attention, in the northern part of the country at least, is the inauguration and whole-hearted support of a propaganda to keep the main roads clear of snow during the winter. In this connection an important point was brought out by the experience of the last two winters, and that is that it is very often **more expensive to let snow lie on the road than to clean it off.** It was found that in a good many instances the cost of repairing damage done to well-built roads by the melting of snow in the early spring amounted to at least as much and probably more than it would have cost to remove the snow immediately after it fell.

---

DISCUSSING the strife between capital and labor, *Automobile Topics* says:

Along with the popular digestion of those natural laws that govern alike employer and employe, has been evolved a series of popular reactions, beyond the control of both, and in some degree equally unfavorable to each. It is now pretty generally understood that the net effect of increasing wages is to increase prices; the purport of Labor's present demonstration being to effect readjustments in working, as well as wage conditions. For every raise that is granted, and every concession bearing on the final rate of production by organized labor, however, it is coming to be felt, the ultimate consumer pays, the employer losing nothing, and the employee gaining but a temporary advantage.

Employers constituting but a small class, and organized labor itself taking a comparatively low place in ranks of the total population, it follows that the issues between them are issues between minorities, while the public becomes in most cases the innocent bystander. Crystallizing this idea, one authority on these very matters phrases it in effect that, Capital and Labor have no right to enter into a conspiracy against the Public."

**Herschell-Spillman Plans Greatly Increased Production**

The Herschell-Spillman Motor Co., Tonawanda, N. Y., is engaged in the expansion of its plant. The present plant capacity of 45 four-cylinder enignes per day will be increased to 100. Equipment and machinery will also at once be provided for an additional production of 100 six-cylinder engines per day. For this purpose a building 160 feet long by 70 feet wide and four stories in height is being erected. Orders for one-half million dollars worth of new machinery are being released. The company has discontinued a number of models of fours, sixes, eights and the aeroplane engine work it has been doing for the Curtiss Company for the last four years, in order to clear the decks for a production on a very large scale of the Spillman 3½ by 5 four-cylinder and the 3¼ by 5 six-cylinder models.

W. B. Powell has severed his connection with John Millen & Son, Limited, Montreal, Can., and is now with Northern Electric Co.

**New Du Pont Car**

Features of the new du Pont car brought out by the du Pont Motor Mfg. Corp., Wilmington, Del., include a four-speed forward selective transmission with direct drive on third, a single steel disk clutch, especially designed springs and spring hangings, aluminum alloy pistons and an unusually sturdy frame. A four-cylinder

DU PONT CAR

engine of the L-head type with the cylinders cast in a block is used. The bore is 3-15/16 in. and the stroke 5⅛ in. Cooling is by the thermo-syphon system and a high tension magneto is provided for ignition. The oiling system is of the full force feed type. A full floating rear axle is used and the brake drums are 16 inches in diameter with a 2½-inch face. The front springs are 39 inches long and 2 inches wide and have underslung rear shackles. The semi-elliptic rear springs are 58 inches long and 2½ inches wide. Both the front and rear tires measure 32 x 4½ inches and the wheelbase is 124 inches.

---

**Duesenberg Racers Set Speed Records**

In three non-competitive speed trials under A. A. A. observation held at Sheepshead Bay, New York, on November 10, Duesenberg eight-cylinder cars established new class figures, one of which is expected to become an official record.

Milton with a 300 cu. in. piston displacement engine (3-1/32 x 5 ¼ in.) shattered all figures in the A. A. A. Class C, 231-300 cu. in. division from 1 to 25 miles, including De Palma's record made on this track in a Packard Special. Milton's time for the 25-mile course was 12 min. 55.74 sec. Several times during the trial Milton approached a speed of two miles a minute, his time between the fourth and fifth miles being 2:02.37-2:32.78.

Lewis, driving a Duesenberg car with 450 cu. in. displacement, established a new figure for the 25-mile course, and O'Donnell, testing for the first time the new Deusenberg 183 cu. in. displacement car, especially designed to conform with the new A. A. A. specifications for 1920 racing, set entirely new records from 1 to 140 miles, including the one-hour mark.

# 42000lbs dead-weight

Even in the shadow of their birthplace do WOOD Wheels perform prodigious feats of strength.

Everywhere, every day are such achievements performed by trucks equipped with WOOD Wheels. Photographs of these are used frequently by truck, axle and even ignition manufacturers for publicity purposes. All deserve commendation, but after all it is the WOOD Wheels that actually *carry* the burden in addition to the truck weight.

For so many years have WOOD Wheels carried huge dead-weights that the performance is now a commonplace.

The tough, fibrous texture of wood has enormous tensile strength combined with resiliency.

This is another reason why WOOD Wheels have been used for years and will continue to be used on the world's best trucks.

AUTOMOTIVE WOOD WHEEL MANUFACTURERS' ASSOCIATION

# The Story Behind This Success

**About FRED VOGLER**

For forty-seven years Fred Vogler has been solving Transportation problems. From the earliest western railroading days to owner and operator of overland Stage Lines in the times when a leather-cased carbine was an essential part of the equipment.

It is men of Mr. Vogler's stamp that make the Bethlehem Organization such a strong factor in the Truck Field.

## NORTHWEST AUTO CO. INC.

DISTRIBUTORS "THE LINE COMPLETE"

PORTLAND, OREGON

Sept.
28th,
1919.

Bethlehem Motors Corporation,
Allentown, Pa.

Gentlemen:

From a two story building 50 x 100 to a five story building 100 x 100, partially illustrates the strides of the Northwest Auto Company during the past year. Although this Company was established in 1898, it was only two years ago that we became distributors for Bethlehem Trucks. We must attribute a good portion of our growth to the Bethlehem product.

Two years ago there was but a scattering of Bethlehem trucks throughout Oregon, Washington, Idaho and Montana. Today throughout every county, Bethlehems are represented in every agricultural pursuit and industrial activity.

The Bethlehem policy of utmost cooperation from the factory through the distributor and dealer to the owner, backed up by a meritorious product, sold at a fair price, is what has built up Bethlehem Truck business and we are certain will build business for any distributor or dealer no matter where located.

Bethlehem to us, stands for more than a truck and for more than a manufacturing plant. It stands for an organization supported by high ideals and the efforts of the Bethlehem Motors Corporation to maintain those ideals have reflected to our benefit, and we are glad to be, and hope to continue a representative of of the Bethlehem Organization.

Very truly yours,

NORTHWEST AUTO COMPANY

V/K F. W. Vogler
President

DIAMOND T

# Pierce Governors

## ALWAYS LINKED WITH THE BEST MAKES OF MOTOR TRUCKS

THE DIAMOND T is only one among ninety-nine prominent makes of Motor Trucks on which Pierce Governors are standard equipment.

Truck Manufacturers who let quality and not price guide them in the selection of units for their truck, do not buy governors until their Engineers have given the different types the most gruelling and exacting competitive tests possible.

As a result of such tests, more Truck Manufacturers are today using Pierce Governors than all other makes of governors combined. Pierce Governors are superior—**always.**

# American Motor Cars Popular in Australia

F. E. Wodell, trade investigator in Australasia for the General Motors Export Company, is now in New York on his annual visit to the home office. In the twelve months since his last trip to the States, Mr. Wodell has noticed an increase in the popularity of the type of motor car design represented by American practice. He says:

"American cars have a high reputation in Australia and New Zealand and this country will continue to dominate the motor market there, although there will always be some demand for British cars. In August of this year 598 passenger cars valued at $664,442 were exported from the United States to Australasia, as well as 44 motor trucks valued at $64,481. Many more cars would have been exported during this period and could be exported at the present time, if production and the overwhelming home demand would permit.

"Among the American cars in this field, the Buick is predominant. The other most popular cars are the Dodge, Hupmobile, Oakland and Chevrolet. Post war British cars have not yet arrived, except several demonstration models. The Vauxhall and Austin are now represented by demonstrators and are securing some orders though the prices are considerably higher than American cars of the same standing. The falling exchange rate is bringing the prices closer together, but Mr. Wodell does not think this will be an important factor in motor car sales unless the Pound drops as low as $3.50.

There has been an embargo on the importation of complete cars, though one body has been permitted entry to every two chassis. All parts of such bodies and all accessories are taxed at various rates, ranging from 10 per cent. to 50 per cent. of 110 per cent. of the value. A considerable body making industry has sprung up in Australia, though the manufacture there of complete cars has not been encouraged.

The costs of motoring in Australiasia are considerably higher than in the United States. In the first place the initial price of a car there is about twice that in this country, due to packing charges, freight rates and import duties. Then the prices of gasoline and oil are high—the former selling at about 60c an American Gallon and the latter about $2.40 an American gallon.

Australia and New Zealand are prosperous and progressive countries, and are giving much attention to the subject of good roads. Plans are being worked out for the expenditure of considerable sums which will result in much road improvement that will bring new impetus in motoring everywhere within their borders.

---

### Perley Joins Elgin

Lieut. W. L. Perley, formerly of the Bureau of Aircraft Production, Washington, D. C., has been made assistant to C. S. Rieman, president and general manager of the Elgin Motor Car Corp. Lieut. Perley was for two years assistant to Mr. M. W. Kellogg, director of production for aeroplane engines. He traveled all over the country visiting plants where these motors were being made, and wrote a fourteen-volume history of aeronautical engine production of the United States for the War Department.

### Attractive Exhibits at Recent Jobbers' Convention

Two attractive exhibits at the recent show of the Automotive Equipment Association in Chicago were those of the Black & Decker fg. Co. and the Victor Manufacturing & Gasket Co., both of which are

BLACK & DECKER EXHIBIT AT CHICAGO AUTOMOTIVE EQUIPMENT SHOW

shown in the accompanying illustrations. Near the center of the Black & Decker exhibit is shown the company's new automatic electric compressor outfit having a capacity of six cubic feet of free air per minute, and capable of furnishing a pressure of 200 pounds. This outfit is designed for the inflation of pneumatic truck tires.

HOW VICTOR GASKETS WERE EXHIBITED AT AUTOMOTIVE EQUIPMENT SHOW

The exhibit of the Victor Manufacturing & Gasket Co. shows the large variety of Victor cylinder head gaskets produced by this concern.

# Systematizing Motor Truck Lines Will Help Reduce Cost of Living

## A. Williams, Jr., President of the Garford Motor Truck Company, Tells How He Believes Problem May Be Met

TEMATIC organization of motor truck ex-ess lines already in operation and intelligent ration of new routes will afford at least a solution to the present high cost of living m, according to men prominent in industry mmerce.

c of adequate transportation is one of the chief s offered for the present crisis. In many government and state officials are investigat-od waste, which, according to the commission nay be traced directly to transportation delays. re are numerous instances of commission aving been indicted for the wholesale disposal dstuffs, which, the commission men claim, lelivered by railroads in unsaleable condition.

ient organization of the motor truck lines in s communities with the idea of eliminating ssibility of idle trucks and light return loads o far toward solving this transportation prob-d reducing transportation costs, in the opinion ny who have given this phase of the matter consideration.

obtain maximum returns from motor truck ortation, the numerous lines now operating be systematically organized," according to Williams, Jr., president of The Garford Motor Company, who has devoted considerable time study of the transportation problem.

thout a unity of purpose there is a capacity in every community. This naturally results oss of tonnage and increased costs. It has aid that 70 per cent. of the motor trucks op-in the United States during 1918 traveled one way. From these figures it was esti-there was a capacity waste of 283,500,000 aring the year.

th the establishment of highway transporta-ommissions in the various states and the or-tion of transportation bureaus in many of ties, this tonnage waste is being eliminated. eral cities the haulage concerns have formed tions and have established central offices which the motor truck transportation activi-f that particular community are directed. associations are affiliating with associations rby cities in order to further recrease the lity of idle trucks and light return loads, and ease the general efficiency of the service.

e motor truck actually has become a public in many localities. Entire communities are ling upon it as a means of supply. It has e equally as essential as the railroad and vay.

obtain maximum efficiency, the transporta-nits of the country—the railway, waterway ghway—should be linked up systematically. highways should be built, the present high-ways improved and a greater number of motor express lines touching those sections not reached by either rail or water, should be created.

"That such a system would have important bearing upon reducing the cost of living essentials is apparent. Available government figures show that in 1919 the cost of shipping by truck throughout the country was from 10 to 30 cents per ton mile lower than the cost by horse-drawn vehicles. One can at least imagine what this will amount to in a year.

"Speakers before a recent convention of retail and wholesale grocers in Toledo voiced the opinion that their hope of reducing prices lay in the motor truck. Practically an entire session of the convention was devoted to this phase of the transportation problem, which they deemed highly responsible for the present high costs.

"One speaker, an officer of the grocers' organization, declared that the motor truck held the actual solution to the problem.

"This recognition of the motor truck as a transportation factor, coming from men who analyze and understand conditions governing the markets is noteworthy, and should be taken as convincing proof of its worth."

---

### Demountable Rims and Self Starters for Fords

The Ford Motor Co., Detroit, Mich., is equipping its sedans and coupes with self-starters and demountable rims as part of the standard equipment, and has raised the price of these two models $100 to cover the cost of the two additional units. The Ford sedan is selling at $875 and the coupe at $750. On the touring car and the roadster the self-starter and demountable rims are obtional.

Without the extra equipment the price of the latter two lines remains the same, $525 for the touring and $500 for the roadster. A few of the touring cars are equipped with the self-starter and are selling at $600. For the self-starter $75 additional is charged while if demountable rims are added, $25 more is asked.

---

### Many Attractive Closed Cars Offered for 1920

*(Continued from page 10)*

of the exterior. The car has sweeping lines from radiator to rear which are unbroken by overhang at the wheel arch.

The interior color scheme is French gray. The upholstery is silk mohair, French plaited. To further the color scheme, the floors are covered with heavy gray tone rugging.

A feature of the Stephens coupe model is the revolving and folding extra seat which makes it possible to carry a fourth passenger. The seat folds neatly away under the cowl when not in use.

# TRADE GOSSIP

E. T. Peterson has accepted a position as manager of the Buffalo branch of the Pennsylvania Rubber Co., Jeannette, Pa. He was formerly district sales manager of the Commercial Car Unit Co. of Philadelphia.

H. J. Porter has been promoted to the position of sales manager of the Timken Roller Bearing Co. He will make his headquarters at the general offices of the company at Canton.

Bob Crowthers has been appointed advertising agent of the Gary Motor Truck Co. His headquarters will be at Gary, Ind.

E. R. Downs is now associated with the F. A. Adams Co., Owensboro, Ky.

J. Fletcher Farrell has been elected a director of Briscoe Motor Corp., Jackson, Mich.

I. Finkelstein is now a member of the staff of the Motor Truck Department of the National Automobile Chamber of Commerce.

Alwin A. Gloetzner has been appointed president and general manager of the Covert Gear Co., Inc., Lockport, N. Y.

Victor Grieff, formerly a lieutenant in the U. S. N. R. F., is now research engineer for the American Bosch Magneto Corporation, Springfield, Mass.

J. A. Haskell is now assistant general sales manager of the Grant Motor Car Corp., Cleveland, O.

S. S. Newton, president of the Luther Grinder Mfg. Co., Milwaukee, has resigned and will retire because of advanced age.

Wm. M. Apperson, formerly of the factory sales force of the Bethlehem Motor Truck Co., is now manager of the truck department of the Universal Auto Co., Hartford, Conn.

Melvin W. Boyle has been appointed sales manager of the White Motor Sales Co., Akron, Ohio.

L. M. Bradley, formerly general manager of the Motor & Accessory Manufacturers' Association, has joined the Frank Presbrey Co., New York City.

Arthur C. Brenckle has been made secretary and general manager of the Olympian Motors Co., Pontiac, Mich.

L. N. Burns has been elected president of the J. I. Case Plow Works, Racine, Wis.

Vernon E. Bush is now manager of the Export Sales Division of the Republic Motor Truck Co., Inc., Alma, Mich.

W. B. Condit has accepted a position as chief draftsman for the Nelson Motor Truck Co., Saginaw, Mich. Mr. Condit was formerly of the engineering staff of the Gramm-Bernstein Motor Truck Co.

C. M. Cornog, recently of the Standard Auto Parts Co., Cleveland, Ohio, is now district manager for the Standard Woven Fabric Co., manufacturers of Multibestos brake and clutch linings.

Russell Monroe has resigned as assistant advertising manager of the Ford Motor Co. to become assistant sales manager of the newly-organized Ford Motor Co. branch in France.

Charles A. Neville has been appointed sales manager of the Hinkley Motors Corporation, Detroit, Mich. He was formerly in the sales department of the company.

Carl M. Page has severed his connection as advertising manager of the Fulton Motor Truck Co., New York City.

W. Carl Parker is now manager of the Reo Motor Car Co., Lansing, Mich.

Jay Dewey has been appointed director of sales of the Lexington Motor Co., Connersville, Ind.

C. F. Hepburn has been made president and general manager of the Republic Motor Truck Co.

James R. Hayes has become assistant advertising manager of the Powrlok Company of Cleveland, O.

Robert C. Crowthers, former Cincinnati automobile dealer but who for three years has been manager of the automobile department of the Cincinnati Commercial Tribune, has been appointed advertising manager of the Gary Motor Truck Co., of Gary, Ind.

N. A. Root, manufacturers' agent, Oakland, Cal., has opened an office at 230 Broadway and plans to accept exclusive agencies for that district.

Albert de Maringh, formerly manager of the Detroit office of the U. S. Ball Bearing Co., has returned to Chicago in the capacity of general sales manager of the Rex Machine Co., manufacturer of valveless power-driven tire pumps, die testing presses and valveless service station equipment.

Digitized by Google

Earl W. McGookin has been appointed sales manager of the automotive division of the newly opened Detroit office of the Duratex Co., of Newark, N. J., manufacturer of coated fabrics.

B. J. Kough, manager of the Marseilles plant of the John Deere Plow & Tractor Co., has been appointed manager of the main plant at Moline, Ill., to succeed H. B. Dinneen, who resigned to become assistant to R. W. Lea, vice-president.

Jay Dewey, formerly district sales manager for the Lexington Motor Co., Connersville, Ind., has been appointed director of sales for the Lexington Minute-Man Six.

Walter S. Gaines, Jr., formerly of the Cleveland Tractor Co., has associated himself with the Mobile Tractor Co., Mobile, Ala., in the capacity of chief engineer.

G. E. Anderson, formerly assistant to the vice-president of the American Locomotive Co., has been appointed assistant eastern sales manager of the Duff Mfg. Co., with headquarters at 50 Church street, New York.

W. H. Haggard, division sales manager of the Emerson-Brantingham Co., Rockford, Ill., has retired.

Walter W. Smith, secretary and treasurer of the O. J. Beaudette Co., body manufacturer, Pontiac, Mich., has resigned. He retains his interest in the company, however, and his seat on the board of directors. He will spend the winter in California.

C. J. Brethaur, formerly with the Commerce Motor Car Co., Buffalo, N. Y., and later with the Walden-Shaw Taxi Co., Chicago, has been made production manager of the Olympian Motor Car Co.

John F. Porter has joined the Cadillac Motor Car Co. as comptroller, succeeding Herman Kinnee, who has been advanced to assistant to the general manager. Mr. Porter comes to the Cadillac company from the Champion Ignition Co., Flint, where he was comptroller.

Harry Shepler, formerly vice-president in charge of Overland production of the Willys-Overland Co., has been appointed production manager of the Rubay Body Co., Cleveland, which builds bodies for Packard and Pierce-Arrow cars.

Edward Tucker, Jr., formerly associated with the Detroit retail branch of the Cadillac Motor Car Co., has accepted a position with the Lafayette Motors Co., Indianapolis, Ind.

W. J. Clucas has been made manager of the new Detroit sales office of the Lancaster Steel Products Co. of Lancaster, Pa. Clucas formerly was connected with the Standard Parts Co. of Cleveland, O.

Henry A. Kroh, for many years southeastern district mechanical inspector for the Cadillac Motor Car Co., and later with the Lincoln Motor Co., has resigned to take charge of the new service station at the Cadillac agency at Charleston, S. C., as service manager.

H. W. Ross was recently elected vice-president of Templeton, Kenly & Co., Ltd., Chicago, manufacturers of Simplex jacks, assuming his duties with that company Sept. 29.

Sam J. Cook, export manager of the Service Motor Truck Co., has returned from an extended business trip, covering the countries of continental Europe, the British Isles and Scandinavia.

Lee J. Eastman has been made president and general manager of the Packard Motor Car Co. of New York. He succeeds Roger J. Gilmour, resigned. He will make his headquarters at the Packard Building in New York City.

Charles H. Reutelsterz has severed his connection with the Motor Materials Co., and the business in the future will be conducted by Walter T. Roos. Reutelsterz has not announced his plans for the future.

Capt. Percival Dodge has been appointed sales manager of the Denby Motor Truck Co., Detroit, Mich.

Major Wadsworth and Chance M. Vought have been elected directors of the United Aircraft Corporation.

John Kelly, for nine and a half years New York district manager of the Edison Storage Battery Co., has been appointed general sales manager of the company, with headquarters in Orange, N. J.

L. H. Earle, who was released from service as captain in the Ordnance Corps last spring, has been appointed eastern representative for the Buda Co., Harvey, Ill., with offices at 1216 Aeolian Hall, 33 West 42nd street, New York.

William J. Hartman, for many years at the factory of the Advance Rubber Co., New York, has been placed in charge of the company's branch just opened at 721 S. Olive street, Los Angeles, Cal.

Erwin L. Malone has been appointed Cleveland district representative of the Hess Steel Corp., Baltimore, Md. His present headquarters will be the Cleveland Athletic Club, Cleveland, Ohio.

Charles C. Howison has been appointed New England representative for the Hudson Motor Specialties Co., Philadelphia, Pa.

William H. Huff, who has been with the Detroit Pressed Steel Co. for some time as assistant sales manager of the frame division, has been appointed advertising manager for both frame and wheel divisions of the company.

George L. Sullivan, for three years advertising manager of the Fisk Rubber Co., Chicopee Falls, Mass., has resigned to become associated with the J. Walter Thompson Co. advertising agency, New York.

Miss M. G. Webber, a member of the advertising department of the Fisk Rubber Co., Chicopee Falls, Mass., and for the past three years in charge of the outdoor advertising of the company, assumes the position of advertising manager for the Fisk company, succeeding George L. Sullivan who resigned.

# MANUFACTURERS' NOTES

The Sampson Accessory Co., Detroit, has incorporated in Michigan for $6,500, to manufacture metal products, including automobile springs and bumpers.

The Tri-Clover Machinery Co. has been organized at Kenosha, Wis., to manufacture brass specialties. The capital stock is $25,000.

The Lewis Steel Products Co., Toledo, Ohio, has let contracts for a new machine shop and foundry building, 150 x 375 ft., estimated to cost $250,000.

The Duplex Engine Governor Co., Inc., Brooklyn, N. Y., has opened a Pacific Coast branch at 17 Spear street, San Francisco. H. C. Reynolds, who has been with the company for some time, will be the manager.

Work has begun on the first of a series of extensions to the plant of the A. O. Smith Corp., Milwaukee, Wis., which will provide 400,000 sq. ft. of additional floor space within a year's time.

The Jordan Motor Car Co., Inc., Cleveland, Ohio, has purchased the Metal Parts Mfg. Co. This factory, which adjoins the Jordan plant, will be used as a new Jordan production unit.

The Higgins Spring & Axle Co., Racine, Wis., announces that any reports to the effect that it has sold out its business and equipment to the Continental Spring & Axle Co., Edgerton, Wis., are entirely erroneous. The Higgins company is still in business and has no connection whatsoever with the Continental Axle Co.

The Traylor Engineering Co., Allentown, Pa., announces that they are planning to build trucks as well as speed up their tractor production.

The Olds Motor Works, Ltd., of Canada, a new General Motors unit established at Oshawa, near Toronto, will have its new plant ready for operation January 1, according to a recent announcement. All models of Oldsmobile cars and trucks will be produced and the output will be restricted to the Canadian field.

Construction of the first of four units made necessary by increasing business of the Acme Motor Truck Co., Cadillac, Mich., is under way. The first unit will be 65 x 144 ft. and with the three other units will double the capacity of the plant.

Nearly $1,750,000 is being invested by the Packard Motor Car Co., Detroit, Mich., in order to increase production in its truck building department. A large manufacturing unit is in process of construction and will be completed soon. This addition is a three-story building having a floor space of 250,000 sq. ft. The Packard company is now running approximately twenty-five trucks a day and is aiming to run production up to 1,000 trucks a month.

The Black & Decker Mfg. Co., Baltimore, Md., has opened an additional office on the Pacific coast, at 201 Maynard Building, Seattle, Wash. This office is in charge of A. E. Nordwall.

Cameron Motors Corp. has been strongly organized to manufacture on a large scale at West Haven, Conn. Several factories are already in operation preparing for an output of Cameron air cooled cars.

An addition, 60 x 140 ft., is being erected in Detroit, Mich., for the Bower Roller Bearing Co., to provide necessary increased capacity.

The Hyatt Roller Bearing Co., Newark, N. J., has undertaken a course in training for foremen and other executives. A group of about 100 men will be in the class. The subjects covered will be team work, handling men, organization, machinery and materials, production records and management, and the solution of typical factory problems.

The Spencer-Smith Machine Co., Howell, Mich., manufacturer of pistons, announced an increase in capital from $100,000 to $200,000 to care for increased business. The company specializes in a light-weight semi-steel piston and is at present filling contracts with the Mitchell Motors Co., the Continental Motors Corp., the Chandler Motor Car Co., Briscoe Motor Corp., Allen Motor Co., Oakland Motor Car Co., Wisconsin Motor Manufacturing Co., Mills Tractor Co. and others.

The Jaxon Steel Products division of the General Motors Corp. will double the size of the addition now being built to its present plant at Jackson, Mich.

The Federal Rubber Co., of Illinois, is enlarging its main factories at Cudahy, a suburb of Milwaukee, by the erection of a large rubber cement storage house, two stories, 50 x 130 ft., and a tank vault, 25 x 100 ft., 17 ft. deep, containing eight 10,000-gal. steel tanks.

### Lynite Aluminum Wheels Revealed at Show

Aluminum wheels for motor trucks and passenger cars will be exhibited for the first time at the New York show by the Aluminum Castings Co., Cleveland, Ohio.

DISC TYPE OF LYNITE ALUMINUM WHEEL

The aluminum wheel has been developed experimentally by the Aluminum Castings Company, the producer of aluminum castings under the trade name of Lynite. It is a one-piece aluminum alloy casting made of the new Lynite No. 145. This alloy was recently developed by the Lynite laboratories after years of research and the company states that with a specific gravity of only 2.9, a tensile strength of 27,500 pounds per square inch and an elongation in two inches of 4.5 per cent., it is considered the strongest aluminum casting alloy yet produced.

SPOKE TYPE LYNITE ALUMINUM WHEEL

One advantage of these wheels is the possibility of reducing the unsprung weight of the car, since they are said to weigh only half that of other wheels. Since the wheels will not rust there is no possibility of the tire freezing to the rim. Also, since aluminum conducts heat four times as well as iron, the tire is kept cooler in long distance operation. It is stated that sets of Lynite wheels are now on test on five or six different standard trucks and to date have shown up very favorably. One set of solid tire wheels installed over four years ago have averaged 30 miles per day over severe roads and only one set of tires have been replaced.

Lynite wheels are designed in either the spoke or disc type. Their lightness facilitates wheel change both in the garage and on the road.

### Cotta Transmission Company Expands

The Cotta Transmission Co., Rockford, Ill., is laying plans for large expansion during 1920.

New production progress is being made and the sales arrangements for the new year are extensive. D. W. Bay, formerly sales engineer of the Motor Bearings Division of the Hyatt Roller Bearing Company, has been appointed sales manager of the Cotta organization. F. W. Ramev. who returned from overseas to take up duties on the sales staff of the Cotta Transmission Company, is Mr. Bay's assistant. Mr. Bay has extensive sales plans for the company upon his connection with it, which commences January 1, 1920.

W. J. McLaughlin, formerly of the Continental Motors Corp., is in charge of production. The building of transmissions has been placed on a large quantity basis by means of the progressive system of assembly in the modern daylight factory located in the new manufacturing ditrict, Rockford, Ill.

In the past year, the organization, switching from a production that was 90 per cent. for war purposes, has brought its commercial and sales production up past the high point of war work without any government business figuring in its volume.

### Roller-Smith Opens Los Angeles Office

The Roller-Smith Company, 233 Broadway, New York, N. Y., announces that its California representative, the Electric Material Company, 589 Howard street, San Francisco, has opened a Los Angeles office in the Title Insurance Bldg. The Los Angeles office is in charge of Mr. E. H. Bell.

### Norma Moves to Long Island City

The Norma Co. of America has moved its factory from the Bronx, New York City, to Anable avenue, Long Island City, N. Y., where a modern four-story reinforced concrete building has been acquired. Under the new arrangement a largely increased factory space is secured, making possible the increased output of Norma bearings necessitated by the growing demand for these units. The new plant is being rapidly equipped with the special machines needed for precision manufacture, and the full capacity will be available shortly. The executive offices at 1790 Broadway have been consolidated with the factory at the new address.

### Mann & McNeille Add Automotive Department

Mann & MacNeille, architects and construction engineers, have added to their organization an automotive department with headquarters in the Book Building, Detroit. This department is designed to render expert building service to automobile dealers, garagemen, repairmen and others engaged in retailing automotive merchandise, and is prepared to carry out work at any point in the country.

### Nash Joins Beaver Mfg. Company

W. H. Nash, formerly in the sales department of The Timkin-Detroit Axle Co. at Detroit, has accepted the position of sales manager with the Beaver Manufacturing Co. at Milwaukee, Wis.

V. Lowener's New York office, 114 Liberty street, will be pleased to receive catalogs and price lists for all kinds of automobile accessories and supplies for export to Scandinavia.

## Three Profits From the Same Effort

Live dealers sell spark plugs that are advertised, because they are easy to sell. They find that advertising saves time in making a sale; that three sales can be made, earning three profits, in the same time it takes to make one when they are trying to sell an unadvertised article.

A Fyrac Spark Plug has *one inch of firing surface* and is a durable plug. These two features are advertised Nationally.

The jobber's salesman will tell you about Fyracs.

NATIONAL SPARK PLUG CO., *Rockford, Ill.*
Export Dept.: 336 Whitehall Bldg., New York City, U. S. A.
Canadian Office: McKinnon Bldg., Toronto, Ontario

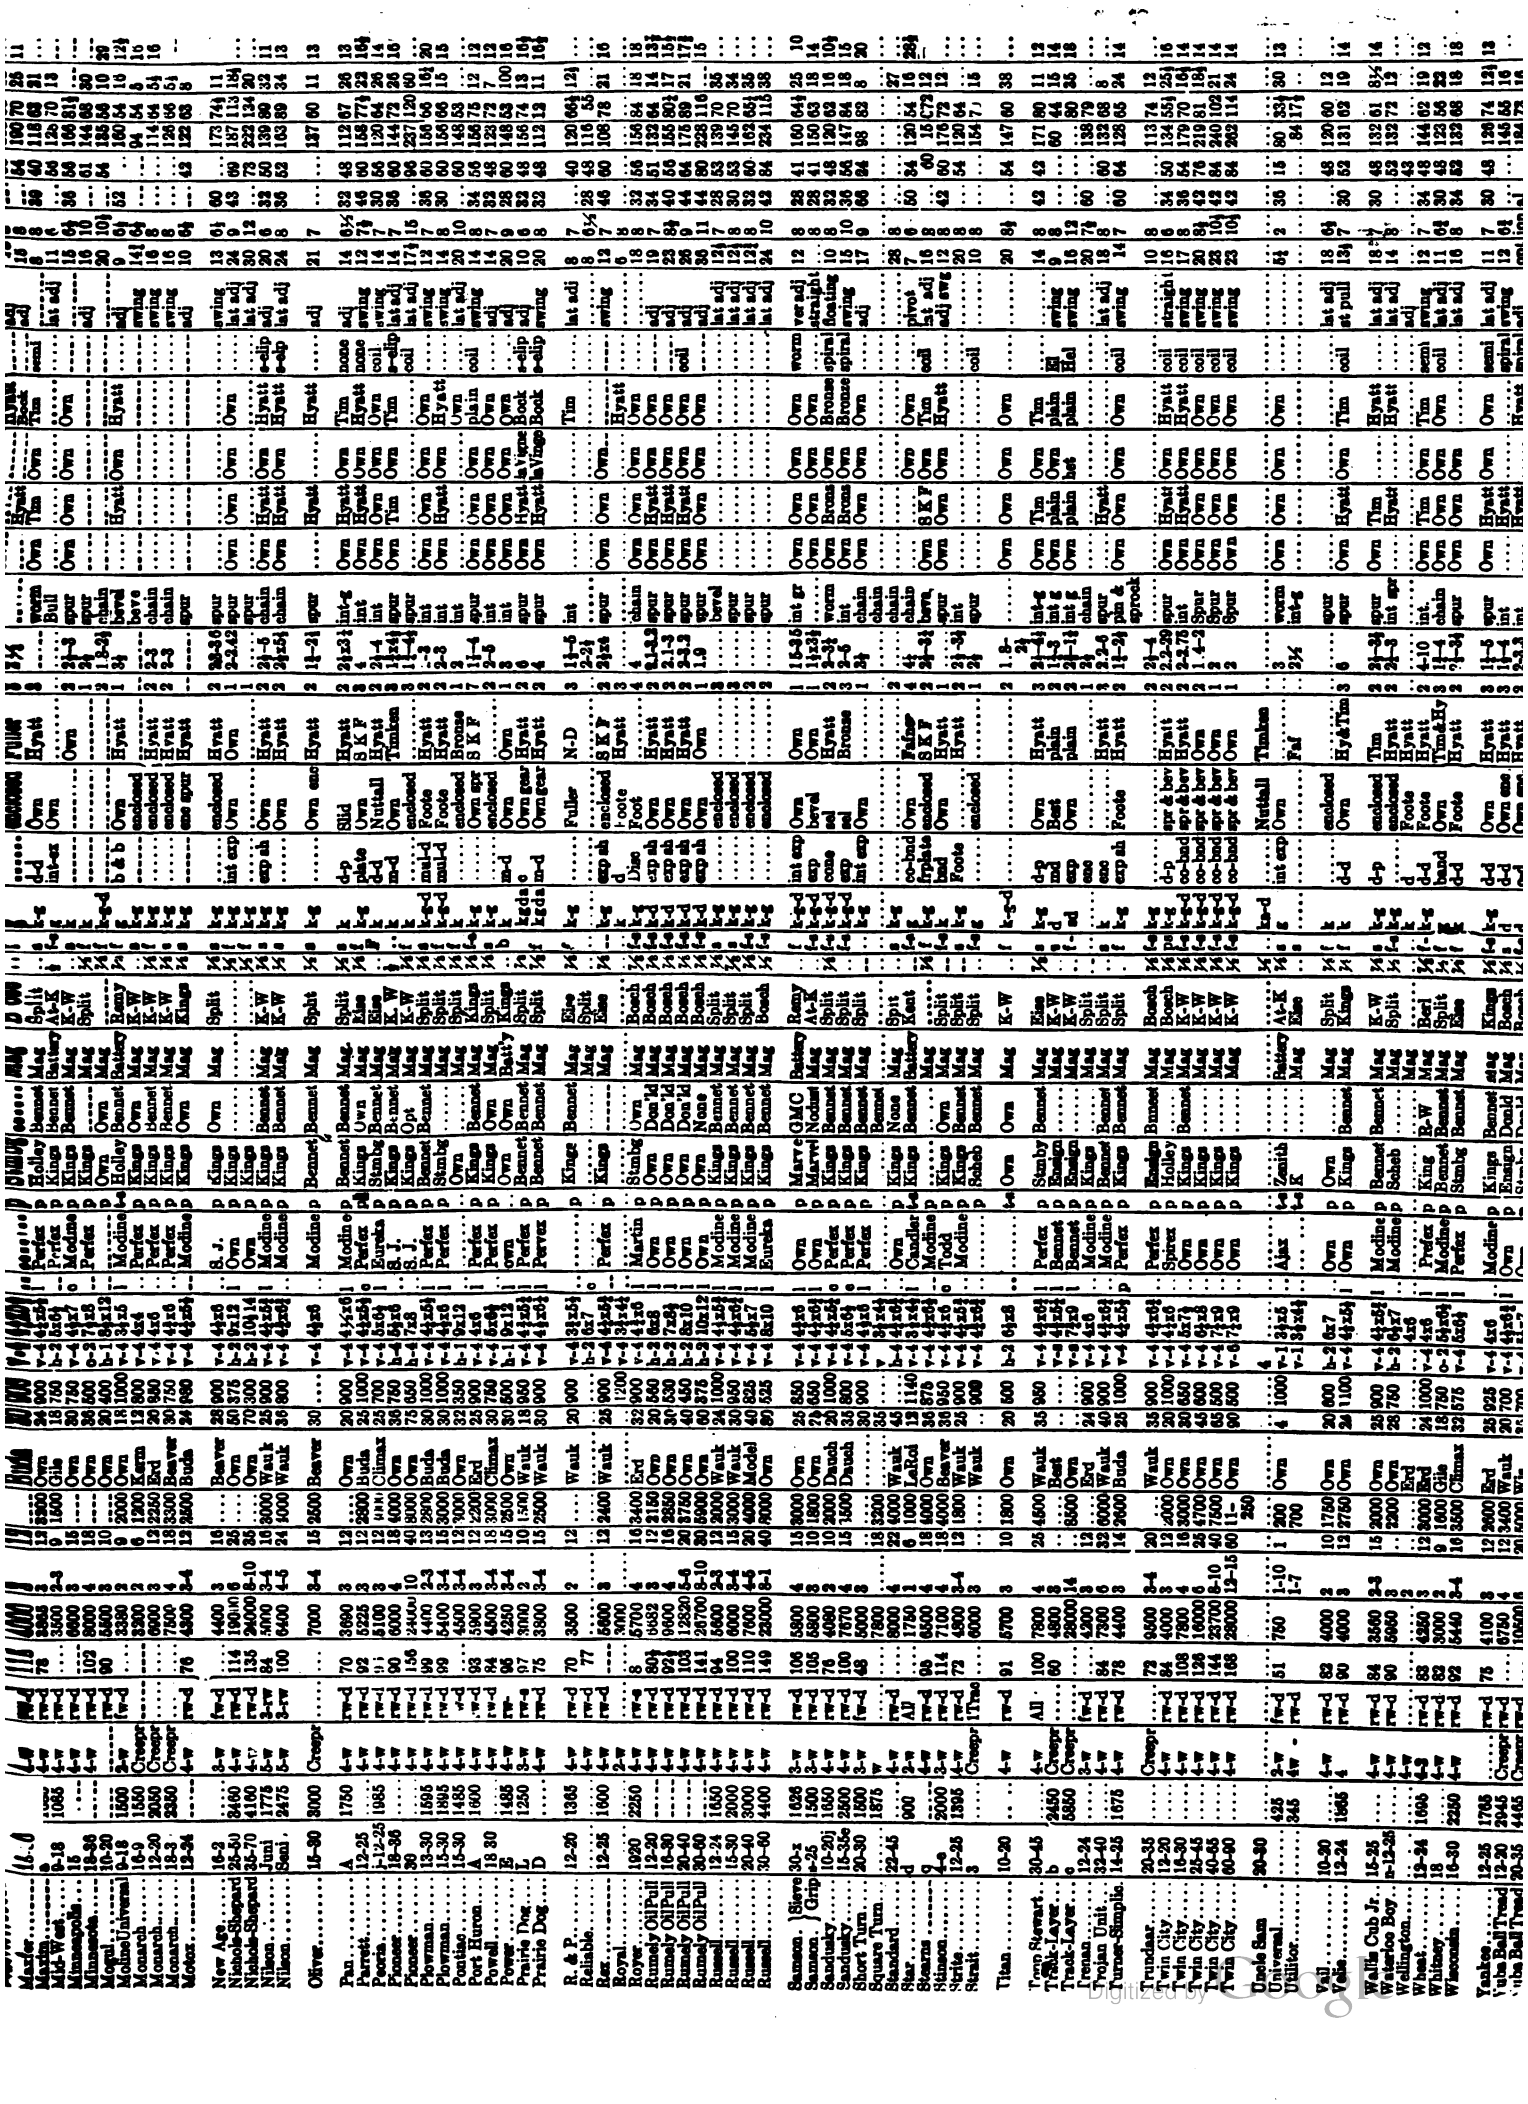
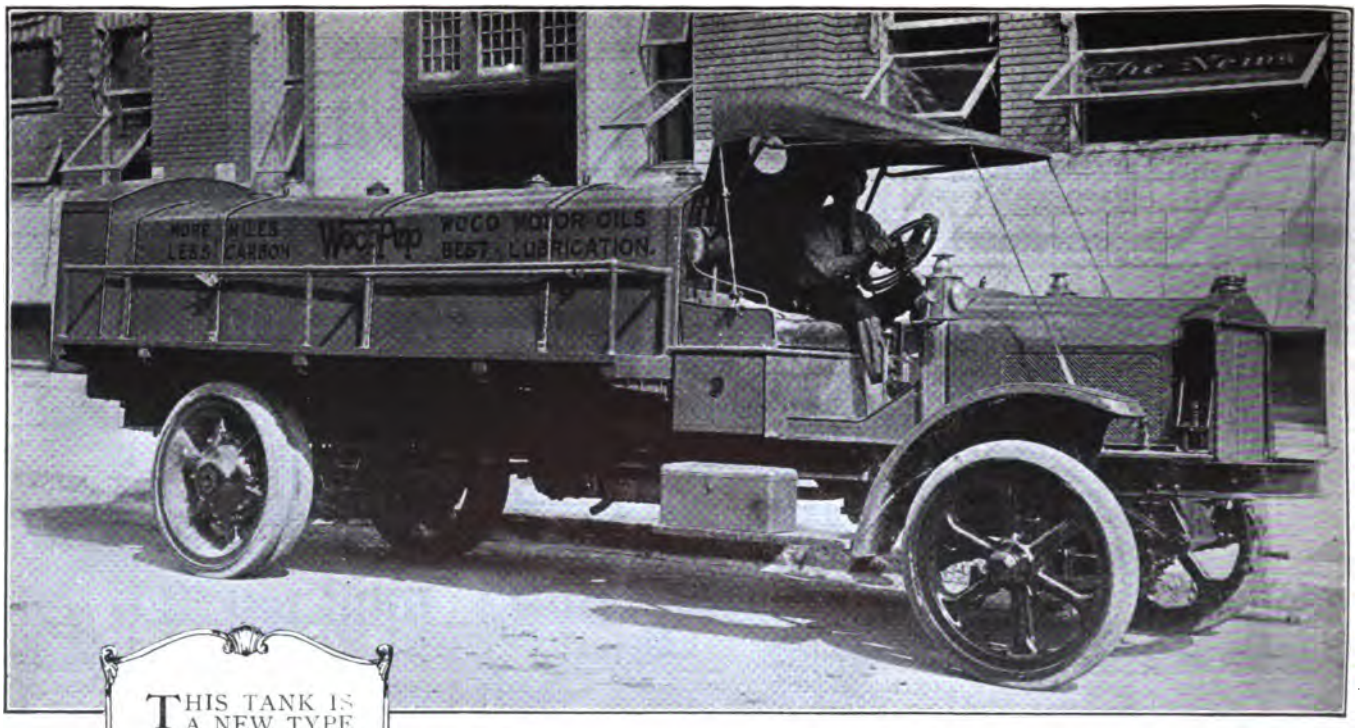
# TRACTOR SPECIFICATIONS—CONT.



Digitized by Google



THIS TANK IS A NEW TYPE OF ONE-PIECE CONSTRUCTION WHICH WAS ESPECIALLY BUILT BY THE WELDED PRODUCTS CO., BIRMINGHAM, ALABAMA, TO CARRY WOCO MOTOR OILS.

# Truck Held Together By Welded Tank When Side Frame Breaks

THE 1,000 gallon, 4 compartment oil tank on this 3½ ton chassis is oxy-acetylene welded in every seam.

It was built to carry heavy loads over southern country roads that "treat 'em rough". The beauty and finish of the tank work are undeniable.

Its strength was amply proven on a recent trip when the rear end of the truck dropped into a deep ditch and one of the 6-inch channel side-frame members snapped clean through. But——

So strong and rigid was the welded tank that, from its 3-point suspension, it held the truck together and permitted it to run to the repair shop on its own power, supported by the tank.

**Prest-O-Lite**

**DISSOLVED ACETYLENE**

in its convenient portable cylinders is every day opening up to manufacturers new and important economies in metal working through the use of the oxy-acetylene process.

Why not tell Prest-O-Lite Engineers what sort of metal work you do? Very likely they can help you to make it stronger, better—and cheaper.

**THE PREST-O-LITE COMPANY, Inc., 30 East 42nd Street, New York**

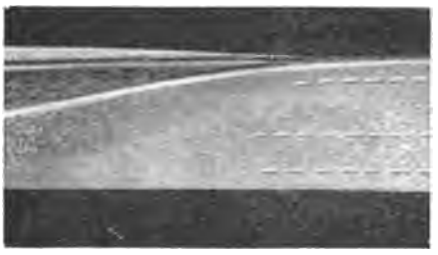
### Inter-state Compression Whistles

Both single tone and tri-tone compression whistles being placed on the market by the Inter-State Tool Mfg. Co., 3419 Rutger street, St. Louis, Mo. The

nal is attached by removing a priming cup from one inder and screwing the whistle in its place. It is erated by a cord running to the steering column. Maials used in its construction are cast bronze and minum.

### Blue Ribbon Brake Lining

According to the Right Motor Specialties Co., 1326 chigan avenue, Chicago, Ill., ordinary solid woven ric brake lining as used on the service break of Ford car throws off carbon which tends to glaze,

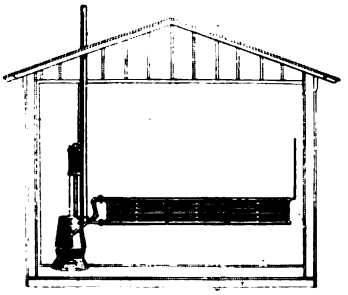


den in a short time and cause chattering when the ak is applied. To offset this defect the company s brought out Blue Ribbon lining which has a ip of cork inserted between layers of tough fabric. This strip of cork serves the same purpose as ings do under the leather of a cone clutch; i. e., provides the necessary resiliency and softness to ke the transmission band action sweet and yet sitive, it is stated. The softer the lining the more ctional power it has. The fabric is treated to ke the fiber soft, and due to the cushion action the cork, the former throws off the carbon which ds to glaze the lining.

### Wasco Garage Heating System

The Wasco garage heating system is offered by the W. A. Schleit Mfg. Co., Syracuse, N. Y. This is a ready-to-set-up heating system, with a perfected automatic control.

As the weather becomes colder, this automatic regulator compels the fire to burn up and produce more



heat in the water of the system. The fire is likewise automatically checked when the temperature has increased to the desired degree.

The system is not connected to the city water system, but is filled once at the start of cold weather with a pail or a hose. Oil is then poured on top of the water in the expansion tank, to prevent evaporation.

### Continental Battery Stand

Storage batteries are very heavy and in their repair it is necessary to constantly change their position in order to more readily get at the various parts. This takes a great deal of effort and besides considerable time is wasted.

To overcome this difficulty the Continental Auto

Parts Co., Columbus, Ind., has brought out the Continental battery stand.

The stand turns very easy, since it is on ball-bearings and can readily be locked in any position. The top is made of one piece of hardwood, 1½ by 7 by 10 inches, which eliminates the danger of short circuit, and will not be affected by acids. It is finished in natural wood color and black enamel and comes complete with screws for attaching to the work bench.

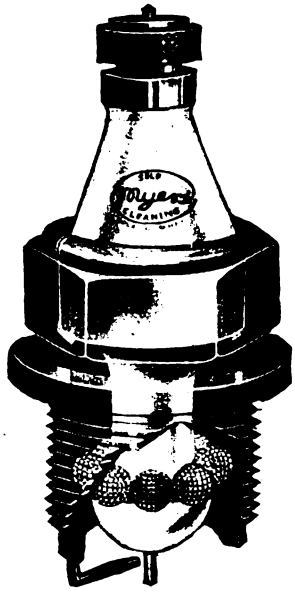
### Myers Self Cleaning Plug

Most spark plug trouble is caused by short circuit on the inside of the plug. Soot and oil collect on the porcelain insulator and inner walls of the plug and the intense heat of the explosion serves to carbonize this deposit. Gradually this deposit builds up on the walls, insulator and spark points and forms a surface on which the oil gathers in a film which becomes a perfect conductor to carry the current to the outer wall and cylinder heads, causing a short circuit.

The Myers Spark Plug Co., Toledo, Ohio, has brought out the Myers self-cleaning spark plug which it is claimed overcomes this difficulty.

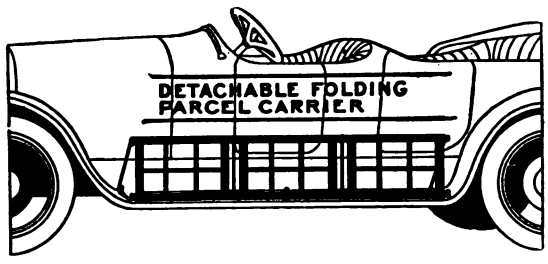


The accompanying sectional view of this new plug shows how the cleaning is accomplished. The plug is made with a special size inner chamber, in which a number of little porcelain balls are placed. With each impulse of the engine, either compression or explosion, these little balls are forced up and down in the inner chamber with the result that their rough surface completely cuts away the soot, oil and carbon and keeps the insulator and inside walls entirely clean of any deposit, it is stated. This, of course, insures a perfectly operating spark plug so long as the necessary charge of current comes from magneto or battery in the usual way.

---

### Standard Luggage Carrier

The Standard detachable folding luggage carrier is being placed on the market by the Rast Mfg. Co., Marshalltown, Ia. It is designed to be attached to the running board of either passenger or delivery



cars and folds up when not in use. When folded up it measures 10 by 15 by 2 inches and when open 10 by 44 inches.

### Motalarm

The Motalarm is a signal to warn the operator of a car when his engine is overheated. The device blows a continual blast when the water is low and the cool-

ing system is not working efficiently. It is operated by the steam generated when the engine starts to overheat. It is easily attached to the radiator by boring a hole in the radiator cap and bolting it to same with a nut and lock washer provided with the device. The tube extends into the radiator tank and should be cut off one inch from the bottom. If this is done, when the signal starts to blow there will still be sufficient water in the radiator to travel 30 miles to safety, it is stated. This signal is made by the Motalarm Corp., 1777 Broadway, New York City.

---

### Guaranty Repair Arm

When the crankcase arm of the Ford engine breaks, it means an expensive repair job. Realizing this, the

Guaranty Motors Corp., Cambridge, Mass., has designed and placed on the market the Guaranty repair arm. This arm can be bolted in place in but a few minutes, giving a permanent repair. The arms are made for both the right and left sides of the engine, and special prongs give additional bearing surface and reinforcement.

### Holt Power-Light Plant

The Holt farm electric light and power plant, manufactured by the Automatic Light Co., Ludington, Mich., consists of a 4-cycle valve in the head,

water cooled, gasoline engine connected direct to a General Electric Company generator and a specially designed electric starting device.

The generator has but one winding and gives a 110-volt current direct to the power appliances or lights, no storage batteries being used. When a switch in the house or barn is turned on the engine starts automatically. The engine has one cylinder with a bore of 2⅜ inches and a stroke of 3 inches, and the normal speed is 1600 r.p.m. The switchboard is mounted on two vertical stands and the complete plant assembled on a substantial iron base.

### New Rayfield Carburetor for Trucks

The Rayfield Model "O" Carburetor is designed for use on truck motors, and in its construction all features have been incorporated which the long experience of the Beneke & Kropf Manufacturing Co., Chicago, Ill., has taught are necessary in the construction of a perfect carburetor for truck use.

The carburetor is of concentric float construction with Venturi tube and air bled jet. The float mechanism as used in this carburetor is of the fulcrum lever type and provides for a positive method of controlling the flow of gasoline into the carburetor.

The float chamber, being located directly below the mixing chamber, any condensation returning from the manifold flows back into the float chamber; therefore, eliminating all leaking and flooding.

Two gasoline levels are employed; the gas first entering into a reservoir—then it rises to the top of the stand pipe and flows into the float chamber proper and is controlled by the float in the float chamber. When the level in the float chamber reaches the desired height, the needle valve is closed.

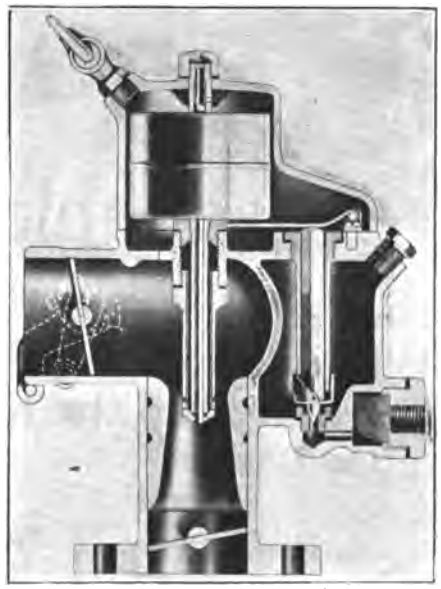
The use of two nozzles is employed; one for intermediate speed gas, which is supplied by the reservoir; and gas for the other nozzle is supplied by the float chamber proper, which cuts in at intermediate and high speed.

Acceleration is obtained by means of an accelerating well, located in the reservoir, and when the accelerating well is drained, air is bled through this well with the fuel.

Both the intermediate jet and the high speed jet are constructed for the use of air bleeders, that is to say, air is bled in with the gasoline before it reaches the nozzle outlet.

By the use of two levels and two separate and distinct nozzles, it is possible to provide for a very thin intermediate running mixture and at the same time provide sufficient fuel for high speed and heavy pulling. This construction results in a very economical performing carburetor, it is stated.

There are two adjustments, one a low speed or idling adjustment; and the other an intermediate or high speed adjustment. Idling gas passes through the throttle shaft when the nozzle is closed. When the throttle is opened, it acts as a valve and gives out this gas at intermediate or high speed, or as soon as the throttle



is cracked at more than one-quarter opening. An air valve choker is used for starting.

### Edwards Sectional Cushion Tire

Endless or pressed-on solid tires frequently become injured, the rubber tread cracking or "chipping," as it is commonly called, and there is a tendency for this chipping to follow the periphery of the tire around its entire circumference. Frequently these injuries reach across the tire breadth and down to the rim, making it unserviceable when it is necessary to remove the wheel, take it to a hydraulic press, often a great distance away, have the tire pressed off and a new one pressed on. Ofter there is only a small piece pulled out of the tire, leaving a large portion of it intact, yet the tire cannot be repaired.

To avoid these difficulties the Edwards Rubber Co., Akron, Ohio, has brought out the Edwards' sectional solid cushion truck tire. This tire is built in twelve sections, each section separate and distinct from the other. With this tire when an injury does occur only a single section or one-twelfth part of the tire will be affected. If the injured section becomes so bad it cannot be used, all the operator has to do is loosen two nuts, remove the damaged section and put a new one in its place. If the new section is too high, it may be cut down with a knife or hack saw. The company states that another feature of its tire is increased resiliency, due to the distance between the sections.

THE ELECTRIC STORAGE BATTERY CO.

# A Seasonable Friend in any Season

A sure start is essential to good motoring.

For a sure start every day in the year, from the daffodils of Spring to the holly of Christmas, cars should be equipped with

The

# "Exide" Starting & Lighting Battery

Its reputation is built on its performance—the only thing that gives value to a battery.

A little more is paid for "The Giant that lives in a Box" but a great deal more is received—more powerful cranking, longer life, better lights, greater freedom from operating troubles.

Our great business built on quality proves this.

Batteries are being thrown away every day that an "Exide" Service Station could and would repair and return to service.

The "Exide" Service Station can supply an "Exide" *exactly* suited to any car.

# Champion

# Dependable Priming Plugs

## —Order Now—

Champion Dependable Priming Plugs are better than priming cups. The gas trickles down the core of the plug and directly over the points where and when the spark jumps. The explosion is instantaneous and sure.

For the hundreds of thousands of automobiles which have no priming cups Champion Dependable Priming Plugs are imperative.

The public demand is big—dealers should order now. *Price $1.50 each.*

**Champion Spark Plug Company, Toledo, Ohio**

*Champion Spark Plug Company, of Canada, Ltd., Windsor, Ontario*

# More DAYLO Customers *for* January

*A NEW and unusually large supply of Daylo purchasers for January is in preparation. They will be ready for delivery to your door January first, guaranteed ready to push their dollars over your counter.*

*We are gathering these buyers from one of the most promising fields that exists among Daylo users—the factories and other industrial plants.*

Daylo magazine advertising for January and February will create a big market for Daylo and Tungsten Batteries among the industries of the entire country.

The magazines have been chosen to reach both employer and employee, and the ads themselves, some of which are reproduced above, will drive home to every plant official and worker the vital necessity of Daylo to increase production, to shorten break downs, to eliminate delays and to increase the profits and pay envelopes.

Right around you there are factories and workers who will be ready to buy Daylo goods in quantities or singly. They can be brought to *your store* if you will join with us on this campaign by making a suitable display with materials which we supply free of charge.

All you have to do is to join the Ever Ready Team Workers. Use the coupon below to find out the details. Act now so as to get in on the January drive.

A-1121

**AMERICAN EVER READY WORKS**
**300 Thompson Avenue**
**Long Island City, New York**

**Please send me, without on obligation my part, full information about the Ever Ready Team Work Plan by which I can participate in the sales resulting from your Daylo market development campaigns.**

VESTA
STORAGE BATTERY
"Costs less per Month of Service"

# Motorists Know the Vesta Sign Means Complete Battery Service

BATTERY users throughout the country have learned to know and appreciate the equipment at all Vesta Service Stations. They have learned also that prompt, efficient and courteous service is always to be found under the Vesta sign. Word-of-mouth advertising from motorist to motorist constantly spreads this Vesta good-will.

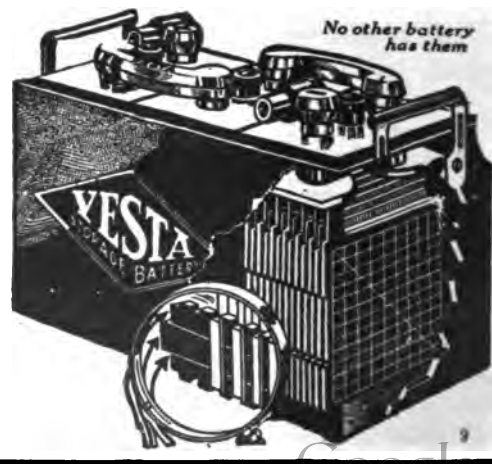
This is one reason why Vesta dealerships are so profitable.

Another is the quality of Vesta batteries themselves. The four patented features found only in these batteries insure longer battery life. Motorists demand these features, and only Vesta Service Stations can supply them.

In certain localities there are still a few openings in our organization. We will welcome to the "Vesta family" responsible dealers who are prepared to live up to the high standards of Vesta Service.

## Reasons for Vesta Satisfaction

1. ***Vesta Indestructible Isolators*** — an ingenious device locking the plates apart and preventing short circuits.
2. ***Vesta Impregnated Wooden Mats***— preventing "treeing" and its disastrous consequences.
3. ***Titanium*** — a rare mineral entering into the lead plates, hardening them and giving them longer life in use. It precipitates minerals and impurities in solution, thus increasing the efficiency of the battery.
4. ***The Vesta Poro-Hard Plate***—a plate which is hard and extra durable, but because of its exceptional porosity, gives unusual capacity.



## Vesta Accumulator Co.

# "Dead Storage" Season is Good Battery Charging Time

for the garage man—

Batteries on dead storage should be charged monthly to insure best battery life. This means regular work for the garage man—work that can be handled on schedule—so to speak. Are you prepared for it?

## Ward Leonard

## Universal Battery Charging Rheostats

This is Type UR-120 Rheostat → charging rate 20-2 amperes, weight approximately 50 lbs. **Price $38.00.**

Another popular size is our UR - 115 size 14x18x5 inches. Charging rate 15-1½ amperes, approximate weight 35 lbs. **Price $25.00.**

Ward Leonard Rheostats are all made with resistance wires completly protected from electrical, mechanical or atmospheric disintegration. Vitreous enamel—the only permanent insulation—envelops and seals the wires against external or internal destruction.

# To the Dealer who is *not* in the battery business

## Do you know:

That more than three quarters of all storage batteries can be replaced from a stock of *five* types of batteries?

That the Philadelphia line includes a battery to replace the battery in any model of any car and that the little used types can be obtained promptly from stocks in practically all large cities?

That practically 100% of all Philadelphia Diamond Grid Batteries are now shipped Dry-Seal uncharged—a method which absolutely prevents deterioration in transit and in stock?

That the Philadelphia Sales Plan includes a 50-50 advertising offer devised to move batteries quickly off your shelves and thus improve your turnover?

*The battery business now offers a chance for clean profits, without complications, without danger of loss — an opportunity that has never been offered before.*

*THE NEW*

**PHILADELPHIA DIAMOND GRID BATTERY**

**With the PHILCO Slotted Retainer**

***Guaranteed for Two Years***

# An Ideal Battery Charger for Alternating Current

The 6-amp., 75 volt Tungar Rectifier will charge any combination of 3, 4, 5, 6 up to 30 cells at 6 or 7 amperes or less from alternating current.

It is a practical device demonstrated by actual service. It equips the garage for efficient battery charging at a much lower cost than any other reliable device of similar capacity. The Tungar Rectifier allows a good profit on battery charging.

The Tungar fastens to the wall thus taking up no floor space. It uses alternating current at a cost of but si : cents an hour for ten 3-cell batteries. It is self-starting, requiring no attend ant.

Fool proof, trouble proof and simple to operate, the Tungar Rectifier charges all sizes of storage batteries up to thirty cells.

# Announcing the First Complete Catalog o Rims & Rim Par

## Table of Contents

Introduction - - - - - - - - Pages 4-6

How to Order and Relation of Rims to Tire Sizes - - - - - - - - - Pages 7-8

A careful reading of this will enable anyone to order parts with quickness, convenience and certainty

Car Application Section - - - - - Pages 9-24

In this section are listed the make, year and model of the various cars. The rim size, the symbol for the complete set and the reference page in the Technical Section are given

Technical Section (Rims and Parts) - - Pages 25-62

In this section under the various symbol numbers are listed the component parts of each complete set

Illustrated Section - - - - - - - Pages 63-70

Here are shown in illustrated form the rims as manufactured by the leading makers

Standardized Rims - - - - - - - - Pages 71-76

How to operate Jaxon Diagonal Split Standardized Rims

Wheelwrights' Instructions - - - - - Pages 77-81

We shall be glad mail you a copy requested on yo letter head. Write t Branch nearest yo

ld sizes are sometimes made for manufacturers on account of quantity buying.

# The Spectacular Spike Test—

Have you ever seen a battery with enough strength and stamina to actually melt two 20-penny spikes in a fraction of a minute?

Mac-Lar will do just that—not only once, but time and time again, without the slightest injury to the battery.

That is why Mac-Lar equipped cars are started and away on cold mornings without a minute's delay. Quick response—an unequalled discharge rate—an enduring stamina—these are Mac-Lar fundamentals.

Mac-Lar is guaranteed for 18 months. Four standard Mac-Lar types fill the requirements of 99 out of a hundred cars, replacing 51 combinations and shapes of other batteries. Consider these facts from the viewpoint of your own experience and you can understand why Mac-Lar is a real selling proposition and why dealers who are building permanent, profitable businesses want the Mac-Lar agency.

*Your territory may still be open. Our dealer proposition will appeal to you. Write or wire for it.*

### Change Parts Tax for Manufacturers

Federal taxes upon accessories and parts, including tires and inner tubes, have been so modified by a new ruling of the Commissioner of Internal Revenue that these parts may be sold to manufacturers without the imposition of a tax. However, the parts thus sold must be utilized by the purchasing manufacturer in making a complete car or machine, the tax then falling upon the completed machine.

These interpretations of the new ruling were made public recently by the National Automobile Chamber of Commerce and the Motor and Accessory Manufacturers' Association. The change in methods of administering the tax follows several conferences between officials of the revenue department with officers of the two motor organizations.

The excise impost, however, according to the ruling, becomes due when the goods are sold to a dealer or to any person or firm who will not use them for manufacture. In this way, it was explained, the boggy of double taxation is done away with, as in many former instances the part was taxed when made and then retaxed when it was put into a car.

The decision announced is No. 2915 and bears the signature of J. H. Callan, acting Commissioner of Internal Revenue. It provides for a change in certificates by the maker, the new form of which may be obtained from the department.

### Melhuish in Automotive Securities

William F. Melhuish, Jr., who resigned some time ago as president of the Fulton Motor Truck Co., Farmingdale, N. Y., has also resigned as chairman of the board of directors, thus severing all connections with the company which he created three years ago. He has been in the automotive game for 16 years.

A new organization, to be known as Melhuish & Co., to specialize in marketing automotive securities, has been formed by William F. Melhuish, Sr., William F. Melhuish, Jr., and Walter G. Herr. It will occupy offices at 40 Wall street, New York City. Walter G. Herr was formerly associated with a member of the Pittsburgh stock exchange.

### Ask for Separate Car and Truck Registration

A campaign will be instituted soon by the National Automobile Chamber of Commerce for the purpose of having the registration bureaus of the various states separate, in their totals, the registrations of cars and trucks. For some years the automotive industry has been seeking figures to show the total numbers of each of these two types in use in this country. So far, only twenty states have separated the two types, the others making their totals include both under the one heading of automobiles.

### Weinhardt Joins Supreme Motors

Robert A. Weinhardt, automotive engineer, has joined the Supreme Motors Co., Warren, Ohio. He was formerly with the Continental Motors Co.

The Lancaster Body Co., Lancaster, Pa., successors to the Mack Body Co., have taken possession of the large new building adjoining the factory of the Rowe Motor Mfg. Co., Fountain and New Holland Aves., and are well equipped for the manufacture of passenger car and commercial truck bodies of every description. A large addition is being made to the present building and new and up-to-date machinery is being added.

### James Abeles Joins the Boyce-Veeder Company

James A. Abeles, well known in the automotive field as former vice-president and general manager of the Motor Car Equipment Company, and more recently, organizer of an eastern house for the Beckley-Ralston Company of Chicago, has recently joined forces with the Boyce-Veeder Corp.

### Clydesdale Increases Its Capitalization $1,500,000

The Clysdale Motor Truck Co., Clyde, Ohio, has just announced an increase in its capitalization from $500,000 to $1,500,000. The original capitalization of the company was found too inadequate to take care of the rapidly expanding business.

The present authorization permits the issuance of $1,000,000 worth of common stock and $500,000 worth of preferred stock, at a par value of $10. The entire preferred issue has been underwritten by a well-known Cincinnati banking concern.

### Winther Will Build Passenger Car

It is announced that the Winther Motor Co., Kenosha, Wis., is about to place a six-cylinder car on the market.

### Aluminum Castings Co., Reorganized

The Aluminum Castings Co., Cleveland, Ohio, has been reorganized under the name of Aluminum Manufactures, Inc., with the additional capital needed to extend and develop the manufacture and marketing of aluminum, brass and bronze products.

The new company, besides taking over and continuing to operate the plants of the Aluminum Castings Co., is planning to construct an aluminum forging plant and other plants for making finished aluminum products, the latter being largely the development of the research laboratories of the Aluminum Castings Company.

The management of the new company will be the same as that of the Aluminum Castings Co. and with its increased facilities will be in better position than ever before to keep pace with the constantly increasing demands for the various forms of aluminum products.

Pending the formal conveyance of the physical assets of the Aluminum Castings Company to the new company, the business will be conducted as heretofore, under the name of the Aluminum Castings Company.

### New McGraw Poster

An attractive poster entitled "Mileage Plus Confidence" is being furnished to dealers by the McGraw Tire & Rubber Co., Cleveland and East Palestine, Ohio.

### Nicol to Manage Garford Branch at Chicago

E. A. Williams, Jr., president of The Garford Motor Truck Co., announces the appointment of Grant C. Nicol as manager of the Garford branch at Chicago. Mr. Nicol assumed his duties November 1. He succeeds George Crane, resigned.

### Toledo to Hold Motor Show

The Toledo Auto Show Co. will hold the annual automobile exhibit the latter part of January and the first of February, the exact dates not having been fixed.

### Firestone Will Have $5,000,000 Plant in Canada

The Firestone Tire & Rubber Co., Akron, Ohio, announces the formation of the Firestone Tire & Rubber Company of Canada, Ltd., with a capitalization of $5,000,000. According to the announcement a factory which will be erected at Hamilton, Ont., will begin operations in five months, with a daily capacity of 3,500 tires of all types. Approximately 2,000 persons will be employed. The company has bought 135 acres of ground at Hamilton. Upon one-half of this plot it will build modern factory buildings with an initial floor space of 320,000 square feet. Upon the other half the company will carry out a housing plan for employees similar to that in Firestone Park, which is a model home community.

### Firestone Increases Stock to $75,000,000

The Firestone Tire & Rubber Co., Akron, Ohio, will increase its capitalization from $15,000,000 to $75,000,000. A resolution authorizing this increase passed without a dissenting vote at the recent annual meeting of stockholders. The company will sell $10,000,000 worth of 7 per cent. preferred stock.

In explaining why such a small portion of the issue would be sold, H. S. Firestone, the president, said:

"We only contemplate selling $10,000,000 worth of the 7 per cent. preferred stock, as that is a very large increase and is sufficient to meet our needs. It was less than three years ago that we increased our capital stock from $1,000,000 to $10,000,000. We had no thought then of using more than $5,000,000 of that preferred issue.

"With that experience in mind and not knowing what the future might bring forth, we decided to make our preferred capital stock sufficiently large so that we could issue more at any time without expense and complications and increasing it from the preferred issue of $10,000,000 to $50,000,000. It is necessary to have half as much common stock. Therefore it was necessary to increase the common stock issue to $25,000,000. We do not contemplate making any issue of the common stock at this time."

Firestone sales from Nov. 1, 1918, to Sept. 1, 1919, were $69,475,197.14 as against $63,821,046.67 for the same period last year or an increase of 9 per cent.

Plans for the immediate construction of a $400,000 mechanical building were made public. This will be located in the rear of plant No. 2.

### Brings Out Manual of Electric Testing

A new bulletin, entitled "Manual of Electrical Testing," has been brought out by the Wagner Electrical Mfg. Co., St. Louis, Mo.

### Marathon Starts Advertising Campaign

An advertising campaign devoted entirely to the dealer's interests, has been started by the Marathon Tire & Rubber Co., Cuyahoga Falls, Ohio. In connection with this the company has brought out a portfolio entitled "Building Good Will for You."

A complete rolling mill unit is being added to the main works of the Aluminum Goods Mfg. Co. at Manitowoc, Wis. It will be one and two stories high, 300 x 400 feet in size, and cost $500,000 or more. A general manufacturing addition to the Manitowoc plant is nearing completion. The branch factory at Two Rivers, Wis., is also being enlarged.

### Parmele Starts Tour for Acme

Leaving Buffalo recently, Harry Parmele, head of the field service department of the Atterbury Motor Car Co., began a three-months' transcontinental service tour.

Traveling by automobile, Mr. Parmele will visit Canton, Ohio, Cleveland, Chicago, Milwaukee, Kansas City, Denver, Lusk, Wyoming, San Francisco, Los Angeles, Portland, Oregon, Seattle, Washington, and many other intervening points.

This tour marks the beginning of a definite policy on the part of the company to render efficient field service in the maintenance of service and operation of Atterbury trucks to both dealers and owners

C. P. Lord has been appointed district manager of the Willard Storage Battery Co., Cleveland, Ohio He will be in charge of the Detroit district office and lower Michigan.

### Buffalo Sets Show Dates

Buffalo's automobile show of 1920 will be held March 1 to 6, inclusive, it is announced. Inquiries and space reservation indicate the show will be the largest in history, according to officials of the Buffalo Automobile Dealers' Association. The show will be held as heretofore in the Broadway auditorium, which has 44,000 square feet of floor space on the ground floor.

### Coninental Axle Organized

The Continental Axle Co., Edgerton, Wis., organized to manufacture motor truck, trailer and tractor axles, has perfected its organization by electing these officers: President, Andrew McIntosh, vice-president, James Higgins, Racine, Wis.; secretary, E. Z. Menhall; treasurer, William McIntosh; general manager, James W. Menhall. The McIntosh and Menhall interests are heavily interested in the Highway Trailer Co., Edgerton. The Continental company is erecting a brick and steel factory, 68 by 290 feet.

### Beats Fast Express Train

An excellent showing for sustained speed was made recently by an Elgin Victory Scout car in a test run from Chicago to Indianapolis. The distance of 193 miles was covered in four hours and six minutes, an average of 47.7 miles per hour, and fifty-six minutes less than the running schedule of the fastest express thain between these two cities. It is stated this run breaks all records between Chicago and Indianapolis for a stock car with full load.

### Puritan Machine Company Expands

The Puritan Machine Co., Lafayette Blvd. at 10th street, Detroit, Mich., has purchased the property at the corner of Fort and 8th streets, now occupied by the All Power Truck Company.

The company has found it necessary to increase the manufacturing department which will be moved at once to the new location.

The Mason Tire & Rubber Co., Kent, O., has begun building extensive additions to its plant, including factory, general offices and garage units. The company recently increased its capital stock to $7,500,000.

# The Still Better Willard

## does away with the most common battery repair expense—re-insulation

YOUR knowledge of electricity has made you realize the tremendous importance of insulation. It's just as important *inside* your storage battery as on any of the wires that lead from it to your lights, starting motor and generator.

Inside that battery are the jars in which are sealed up the plates (positive alternating with negative), the battery solution, *and the insulation which separates each positive plate from its negative neighbor.*

In ordinary batteries the first thing to wear out is this insulation. Jars and plates may still be in good condition, but the battery has to be opened and "reinsulated" at considerable expense. After that, no one knows how long it will last. It may be long enough to offset the expense, it may not.

But the invention of Willard Threaded Rubber Insulation entirely does away with this most common cause of trouble and expense.

The Still Better Willard does not have to be reinsulated; because it has the durable threaded rubber insulators which last the full life-time of the battery.

Four years' experience on thousands of cars is daily proving how much Threaded Rubber Insulation means to the car owner in better battery efficiency and fewer battery repairs.

Next time you call, ask us for a fuller explanation of the Still Better Willard.

*Willard Service.*

**With Threaded Rubber Insulation**

**Willard STORAGE BATTERY**

**Willard Threaded Rubber Insulation**

Inside the battery box are the rubber *jars* in which the *elements* and battery solution are sealed, thus constituting a unit which is called a *cell*. This cell is separated and insulated from the other cells in the battery by the *rubber* jar.

Inside the cells are two *groups* of *plates*, one *Positive*, and one *Negative*. These are so put together that they alternate and are insulated—positive from negative—by Threaded Rubber Insulation.

The *insulation* performs the important task of separating each positive plate from its negative neighbor, preventing short circuits which would soon wear out and ruin the battery. The better the insulation, the better the battery.

# ist Price of Storage Batteries for Cars From 1912 to 1919

## REVISED MONTHLY

**TO USE THIS TABLE.**—These prices are consumers prices of standard batteries, F.O.B. Home Office. Freight or express charges will have to be added. Weight of battery is given s purpose. Look in Electrical Specifications Department for name and year and model of car: Find the serial number under the battery desired; look in this table for that serial r and you will find the battery that will fit that car. Be sure and give the type number and order, or part number, in ordering. Do not pay any attention to serial number, as created by us to enable you to find the right battery quickly. Prices here given are taken from the latest price lists we have been able to obtain from manufacturers, and will mitted to manufacturers each month for revision. This compilation is for the benefit of the trade. We have used every care to give the latest, authentic information, but we guarantee the correctness of these prices and cannot be held liable for same.

# Over Winter store your Battery USL "DRY-CHARGED"

IT'S thrifty to avail yourself of the USL Dry-Charged Storage Plan to make sure *now* of reliable battery action in the spring and staying power thru next summer.

For a battery is indeed a nervous, strenuous thing that knows no repose. Lay it away quietly, as you think, and it carries on a constant chemical action, always changing its state, always at work and sweating off its charge. That's why mis-called "idle" batteries need periodic charging and attention, which means *wear*, though service to you is suspended. USL Dry-Charged Storage prevents this wear or deterioration of any kind while the battery is laid up.

But the best reason for USL Dry-Charged Storage is the *certainty* of a *real* live battery for your next season. No matter what the make, let the nearest USL Service Man examine your battery. He'll overhaul it and give you a just verdict, based on the battery's condition, as to whether storage in your case is "good business" for you. This expert's verdict may save you annoyance and expense later on.

If he says: "Yes, this is worth storing USL Dry-Charged," he'll take it in hand and will agree to give you an eight-months' adjustment guarantee of good service to date from the day next spring on which he delivers your battery to you.

The USL Service Station will Dry-Charge and air-seal the battery the *USL factory way*. This prevents deterioration which would otherwise set in. There is no wet-storage wear.

Next spring, on three days' notice, the USL Service Man will connect the battery in your car. It will not only have suffered no life-loss thru the winter, but will be a rejuvenated—a *sure satisfying* battery.

No matter what the battery make, drive around to the USL sign in your town and let the Service Man explain.

If you run your car this winter use *extra* precaution; call on the USL Service Station weekly; don't let your battery run down and freeze.

**U. S. Light & Heat Corporation, Niagara Falls, N. Y.**

The greatly increased demand for Wisconsin worm-drive axles has forced the Wisconsin Parts Co. to increase its facilities in both additional space and equipment several times during the last few months.

The Board of Directors has authorized an addition to the main plant of a building 240 feet in length. The Directors also have authorized the purchase of a large amount of machinery to take care of the additional business on the books.

---

At a recent meeting of the directors of The Norma Company of America, Mr. O. P. Wilson, who has been assistant general manager for several years, was elected vice-president of the company. Mr. W. M. Nones continues as president and treasurer, in executive charge of the company's affairs.

## Convention of Automotive Equipment Association a Success

The fourth annual meeting of the Automotive Equipment Association held in Chicago No. 3-8 proved very successful and members expressed themselves as being highly pleased with the work at the meeting.

The association adopted a new constitution and by-laws, the original set having been discarded entirely following the Sherman law criminal case in which 21 members were acquitted of charges.

The First Annual Business Exhibit, a display of automotive equipment, proved so successful that a business exhibit in the automotive equipment industry may be one of this industry's great affairs.

Not the least among the events of the week was an entertainment put on for the association by the Chicago Automotive Equipment Manufacturers in the Aryan Grotto Temple. This was an amateur minstrel show and mock trial which convulsed a packed house of over 1200 people.

Of considerable importance was the selection of Del Monte, California, as the place of the next meeting, the first week in June, 1920.

---

## Milwaukee Dealers Seek to Combine Automotive Bodies

A movement to bring all interests identified with the automotive industries of Wisconsin into a single organization which probably will be called the Wisconsin Automotive Federation, is under way with the intention of bringing it to a head by means of a big convention to be held during the annual Milwaukee show in the Auditorium in January. The proposition is made by members of the Milwaukee Automobile Dealers, Inc., the success of which is believed to form a splendid example of what can be accomplished through thorough organization.

---

## Boyce Forms New Fire Extinguisher Company

Harrison H. Boyce of the Moto-Meter Co., Inc., Long Island City, N. Y., has formed a new company, the name of which will be the "Boyce-Veeder Corporation," having its factory and office in Long Island City, for the marketing of an automatic and hand operating fire extinguisher especially applicable to motor cars, trucks, tractors, aeroplanes and other automotive vehicles.

The new company will operate under the "Erwin" patents, and the device is said to be of a very novel and most meritorious nature.

Associated with Mr. Boyce will be Paul L. Veeder, an attorney well known in both New York and Chicago. Offices have already been opened in the Queens Subway Building, Long Island City. It is stated that production will be in full swing January 1st. Mr. Boyce plans to divide his time between the new organization and the Moto-Meter Company, Inc.

# List-Prices of all Makes of Tires and Tubes

## REVISED MONTHLY

EXPLANATION:—Under each size we have placed the list price of not only Casings, but also Tubes. The letters to the left of the line show the Type of Tread and C lor of Tubes. P means Plain Tread; N. S. Non-Skid; G. T. Gray Tubes; B. T., Brown Tubes; R. T., Red Tubes; When price is given without letter or sign it means that the tire is manufactured in Clincher, Quick Detachable Clincher, and Straight Side or Dunlop types. When a C appears with the price it means that the tire is made in Clincher type only; when Q, in Quick Detachable only; when D, in Dunlop or Straight Side only; when †, in both Clin her and Quick Detachable; when *, in both Quick Detachable and Dunlop or Straight Side; when §, in both Clincher and Dunlop or Straight Side.

This compilation is for the benefit of the trade. We have used every care to give the latest authentic information, but we do not guarantee the absolute correctness of these prices and cannot be held liable for same. The Ferguson Publishing Co.

# When You Say "Dependability" *Prove* It!

A TIRE is good only when it's good all through. Time and again you have found this true from personal experience. One high-grade tire gives 10,000 miles, another of the same quality only 2500. It's the physique of a tire that makes or breaks it!

That's why McGraws can be depended upon for high and full mileage. They have the physique and you can *prove* their dependability. The reason is simple and scientifically sound.

It is summed up in the McGraw Duplex Method of vulcanization which safeguards the tire against mold-pinches and buckles, the two worst enemies of tire life. The McGraw comes out of the molds a *perfect structure.*

"Dependability" in tires is the surest bond that you can establish between your tire customers and yourself. It's a big contract, but McGraw fulfills it to the letter—*and at a substantial profit to the dealer.* Write for territory.

THE McGRAW TIRE & RUBBER CO.
CLEVELAND, OHIO
Factories: East Palestine, Ohio

# RACINE TIRES

RACINE RUBBER COMPANY EXTRA TESTED TIRES

## *Multi-Mile Cord and Country-Road Fabric*

## Make More Money

RACINE dealers are making more money than ever before and they have always profited. They are the leaders in every community.

The reason is, the Racine Line offers a definite and continuously prosperous way to build profit volume.

Racine Multi-Mile Cord has an exclusive and unequaled sales feature — Racine Shock Strip. This feature is the industry's supreme mileage achievement.

Racine Multi-Mile Cord, like all Racine Tires, Tubes and Supreme Tire Sundries is

## Extra Tested

Racine Country Road Fabric is designed for severe country road service. Its performance makes it popular. Dealers selling the Racine Line build permanently.

## Nationally Advertised

Racine advertising, smashing sales wallops, blankets the country. Every city and town knows Racine "Extra Tested" Tires, Tubes and Sundries.

Racine distributors located conveniently are on the job constantly to give dealers service and co-operation.

**RACINE RUBBER COMPANY**
Racine, Wisconsin

— an extra strip of blended rubber uniting tread and carcass preventing separation.

# AJAX CORD

With prospects for bigger business than ever in 1920, the tire dealer will do well to investigate the AJAX opportunity.

There are big reasons why the Ajax Dealer's Franchise for 1920 means even more than ever.

The Ajax salesman can tell you—or you can get the information by writing us direct.

A complete line of Ajax quality products —Ajax Cord, Ajax Road King, Ajax Inner Tubes, Ajax H. Q. (High Quality) Tire Accessories.

**AJAX RUBBER COMPANY, Inc.**
New York City
Factories: Trenton, N. J. Branches in Leading Cities

# FEDERAL

## Accessories and Repair Materials

*Ford Fan Belt*

*Repair Gum*

*Safety Step Mat*

THE Federal line of automobile accessories and repair materials is unusual for its high quality, completeness and long service.

It is, therefore, a representative, highly desirable and profitable line for dealers to handle.

Only a few of the items comprising the entire line are shown here, but we shall be pleased to send complete catalog, prices and discounts to the trade on application.

*Combination Hook-On-Lace-On Boot*

*Reliner*

*Inside Sleeve*

*Radiator Hose*

*Ford Mat*

*Para-tite Repair Material*

**THE FEDERAL RUBBER COMPANY**
**OF ILLINOIS**
**Factories, Cudahy, Wisconsin**

Manufacturers of Federal Automobile Tires, Tubes and Sundries, Motorcycle, Bicycle and Carriage Tires, Rubber Heels, Fibre Soles, Horse Shoe Pads, Rubber Matting and Mechanical Rubber Goods

*Sealtite Repair Material*

# BILTWELL TIRES

"MASTER OF THE ROAD"

## LONG SERVICE
of
## BILTWELL TIRES
**Lies in**

— the rich quality of materials used.

— the expert workmanship incorporated in their manufacture.

— the fact that they are extra well reinforced where stresses are applied.

— and the fact that the last word in rubber-making machinery is used in their construction.

*Some attractive territory is still available for the man who wants the best.*

**THE BILTWELL TIRE & RUBBER CO.**

**MADE AT AKRON**

TRACTION TREAD

# GLOBE CORDS

## GUARANTEED 8000 MILES

**FABRIC TIRES 6000 MILES**

# Economy through Quality

It takes longer and costs more to build tires in the Globe way than in the ordinary way. But the extra time and extra care give extraordinary results in added mileage.

Globe Tires—Cord or Fabric—are made slowly and carefully by hand, because that is the way to give users the most miles for their money.

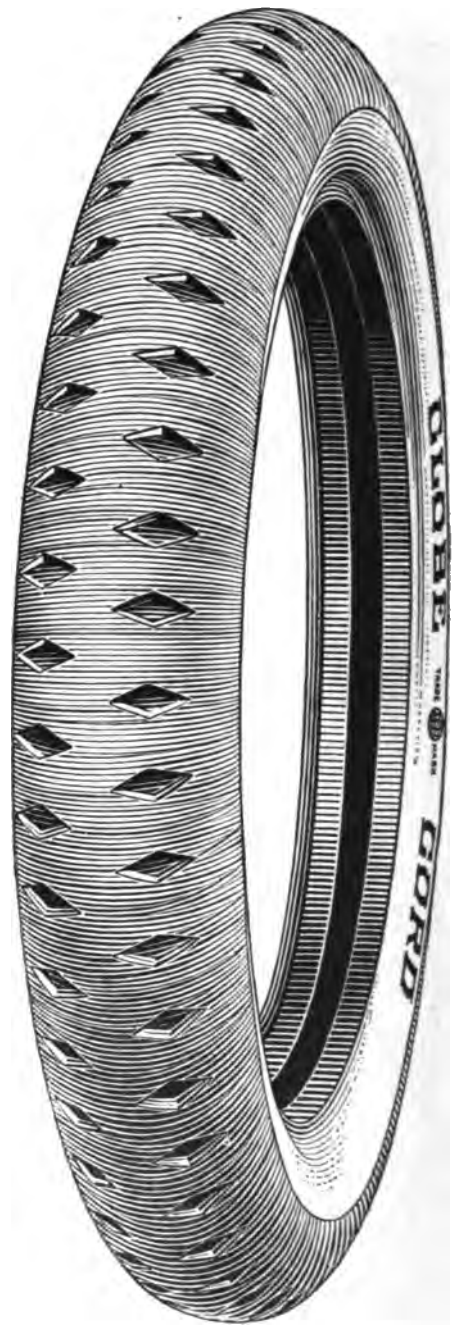
They cost about 10% more to make than ordinary tires, but they give about 50% more miles. So, figured on a mileage basis, Globe Tires are the most economical tires your customers can buy.

***To responsible dealers only: If Globe Tires are not represented in your city or town, write us promptly for our exclusive proposition.***

## GLOBE RUBBER TIRE MANUFACTURING COMPANY

***Executive Offices:*** 1851 Broadway, New York
***Factories:*** Trenton, N. Y.

NEW YORK BRANCH: 1851 Broadway
CHICAGO BRANCH: 2029 S. Michigan Ave.
PHILADELPHIA BRANCH: 804 N. Broad St.
BOSTON BRANCH: 679 Beacon St.
BROOKLYN BRANCH: 1130 Bedford Ave.



***Globe Tubes in Globe Tires make the ideal combination***

***Oversize Globe Cords are now available in small sizes for Ford, Dodge, Maxwell, Chevrolet, Overland, Studebaker 4, and others.***

"Built By Cord Tire Specialists"

# Count the Cords at the Shows!

NOTICE the cars displayed at the automobile shows this year and the percentage having cord tires as original equipment.

The predominant feature of the tire industry today is the great demand for cord tires. Car manufacturers realize that cord tires cushion the mechanism of the motor and preserve the life and newness of the entire car. Car owners who once use cords are satisfied with nothing else.

Realizing this, a group of cord tire specialists from some of America's largest tire companies are building SYRA-CORD TIRES in a factory where the only tires made are cord tires. By specialized production, improved processes and best quality materials, they have placed SYRA-CORDS at the peak of cord tire development.

SYRA-CORD service and the economy of the SYRA-CORD universal tread will surprise you.

*Some dealer territory still open. Better wire today!*

SYRACUSE RUBBER COMPANY, *Inc.*

SAN FRANCISCO, CAL.—Seventh Annual Foreign Trade Convention; May 15-20.

---

### Louisiana Dealers Form Association

Organization of the Lake Charles Automotive Trade Association was affected at a meeting of dealers in automobiles, supplies and various other lines in the industry, held at Lake Charles, La., recently. The purpose of the new association is to handle the plans for the convention of Louisiana-Mississippi Automotive Trades Association, to be held in this city March 17 and 18, and to promote a higher business standard in the industry as represented in Lake Charles.

---

### Hartford Battery Co. to Start Production

The Hartford Battery Mfg Co., Hartford, Conn., is equipping its new plant as rapidly as possible and by

January 1 expects to be turning out 100 storage batteries a day. Within three months the company hopes to be able to increase production to about 300 batteries a day. The plant consists of two buildings, one measuring 60 x 136 feet and the other 30 x 180 feet. They are of up-to-date construction throughout.

### No Change in Garford Interests

Recently there have appeared in various issues of the press throughout the country items stating that Mr. John N. Willys of the Willys-Overland Co., owns control of the Garford Motor Truck Co., Lima, Ohio.

The Garford Motor Truck Co. has given out a statement that these rumors are unfounded. They advise that neither Mr. John N. Willys, nor the Willys-Overland Co. are financially interested in the Garford Co.

The statement of the Garford Co. goes on to say that on January 13, 1915, the interest of the Willys-Overland Co., and other interests in the Garford plant, were purchased by the present organization, since which date the present management has been in charge. The Garford Motor Truck Co. is an independent corporation, and has no affiliation with any other automobile or motor truck interests, it is stated.

### Convention of Prest-O-Lite Distributors

A convention of Prest-O-Lite distributors was held recently at Richmond, Va., in the Jefferson hotel. This is the first year that the Prest-O-Lite company has used this method of creating the one family idea between the officials and those representing the company in the different localities, and is due to the infusion of young blood in the active management of the company. It proved a great success.

### Work Progressing on $800,000 Templar Plant

Construction has been started on an $800,000 addition to the Templar Motors Corp. plant in Lakewood, Ohio. The new building is absolutely fireproof, of concrete, steel and glass construction, of the most modern type and will include every modern improvement in factory equipment.

The building is three stories high with the front finished in cut stone, and when completed will give the Templar plant over ten acres of floor space. A double track 800 feet long, which is a spur off the New York Central main line, runs through the center of the main building.

The company restaurant, power-house, foundry, nickel plating plant, factory service station, material storage bins, sheet metal department are each housed in a separate building. When final plans are completed all parts entering into the Templar cars will be manufactured within the Templar plant with a production of over 10,000 cars annually.

### Nelson Car Makers Absorb Gray Motors

The E. A. Nelson Motor Car Co. and the Gray Motor Co., both of Detroit, Mich., have consolidated and will manufacture the present Nelson car on a greatly enlarged scale. The Nelson company was organized in 1917 while the Gray Co. has been in business since 1905. The new concern will be known as the Nelson Motor Car Co.

The capital stock of the company has been increased to $2,000,000 and shortly will be increased again to $3,000,000, of which $1,000,000 will be 8 per cent. preferred and $2,000,000 common. This second increase will provide funds for the amalgamation.

Officers of the Gray Motor Car Co., headed by D. J. Mulford, the president, will retire. The new company will be managed by the present Nelson personnel.

## Personnel of Willys Corporation Complete

The executive personnel which will direct the financial and industrial activities of the Willys Corporation for the ensuing year has been announced by John N. Willys, president.

In addition to President Willys, the officers are J. R. Harbeck, vice-president in charge of New York executive office; C. O. Miniger, vice-president in charge of Electric Auto-Lite Division operations; J. Allan Smith, vice-president in charge of New Process Gear unit operations; Jay V. Hall, vice-president in charge of motor car production; E. P. Decker, treasurer, and C. B. Mertz, secretary.

The board of directors is composed of John N. Willys, Edward F. Swift, F. S. Wheeler, J. R. Harbeck, Charles Stolberg, C. O. Miniger, J. Allan Smith, Jay V. Hall, C. B. Mertz and J. E. Kepperly.

The corporation's major operations, the building of a new light six-cylinder motor car at its recently acquired plant in Elizabeth, N. J., will be under the executive charge of J. R. Harbeck.

Mr. Harbeck is vice-president of the American Can Company and general manager of the munition operations of that company.

Jay V. Hall, vice-president in charge of motor car production, will, as his title indicates, be in complete charge of production of the new light six-cylinder car. Mr. Hall formerly was sales manager and a member of the executive committee of the Olds Motor Works, a General Motors Company unit.

He will be assisted by D. F. Edwards, who, for two years, was assistant to the president of the General Motors Company and one of the members of the executive committee of the Olds Motor Works. Mr. Edwards later had charge of operations of the Gair Pressed Steel Company, Lansing, Mich., exclusive manufacturer of steel specialties for the automobile trade. He comes directly from this company to assume his new position as assistant to general manager Hall.

D. S. Dover, for many years works manager of the Olds Motor Works, has been appointed manager of the Willys Corporation's Elizabeth, N. J., plant. His connection with the production of successful motor cars dates back a number of years.

Frank H. Schuman, until recently superintendent of the Buick Motor Car Company's motor plant, has been named assistant works manager.

F. Sergardi is chief engineer of the Elizabeth plant. Mr. Sergardi formerly was identified with the F. I. A. T. Motor Company of Turin, Italy, and for the last four or five years has been chief engineer of the Olds Motor Works.

P. L. Battey, consulting engineer of Willys-Overland, Inc., is in complete charge of all plant engineering and construction work. He formerly was vice-president and general manager of Price & Company, Chicago.

Robert E. Naylon, formerly superintendent of the gear department of the Hudson Motor Car Company, has been selected for a similar position in the Willys organization.

### New Black & Decker Catalog

The Black & Decker Mfg. Co., Baltimore, Md., has brought out its fall catalog of electric air compressors, portable electric drills and electric valve grinders. In order to keep the trade thoroughly posted the company is now issuing catalogs twice a year

# BEARING DATA SECTION

In this section we have published the type number of both Ball and Roller Bearings used in about 3,000 models of Passenger Cars and Trucks from 1909 to 1919. Where Ball Bearings are used only the number of the bearing is given. Where Roller Bearings are used both the name of the bearing and the number are given.

## EQUIVALENT TABLE OF ANNULAR BEARINGS

Annular Ball Bearings are interchangeable. Below is a table showing the type number of each manufacturer equivalent to numbers we have used, which appear in the first column.

| Key Bearing Numbers | Hess-Bright | | S. R. B. Ball | Gurney | U. S. | Fafnir | R. I. V. | F. & S. | S. R. O. | Norma Ball | Schafer | B. K. F. | S. K. F. | Rhineland | R. B. F. | New Departure | |

# FAFNIR

*Single Row Radial (Medium) 200 Series*

*Double Row Radial (Medium) 6300N Series*

*Double Row Radio Thrust (Medium) 8300 Series*

*Magneto or Open Type (Extra Light) 5100 Series*

## Fafnir Single Row Bearings Series 200, 300, 400.

Complete factory stock carried. These interchange with single row series of all standard makes.

## Fafnir Double Row Bearings Series 6200N, 6300N, 6400N.

Stocks carried of all most called for sizes. These bearings interchange with American width double row bearings.

## Fafnir Double Row Angular Contact Bearings 8200, 8300, 8400

These bearings have same dimensions as 6000N Series. They are designed to take exceptionally heavy thrust loads in addition to radial loads.

## Fafnir Magneto Type Bearings 5100, 5200, 5300 Series.

These bearings are largely used in magnetos and starting and lighting units.

### *Largest Assortment of Types and Sizes in America*

*Following is a list of distributors of Fafnir Ball Bearings. Substantial stocks are carried by all distributors and prompt and efficient service will be rendered by them on receipt of orders and inquiries.*

# NEW DEPARTURE

## Also Authorized by Timken and Hyatt

The only authorized service organization for the New Departure Manufacturing Company of Bristol, Connecticut, manufacturers of New Departure Bearings, is the Bearings Service Company.

With 26 Branches in the principal cities of the United States and over 900 Authorized Distributors this is a truly nation-wide service.

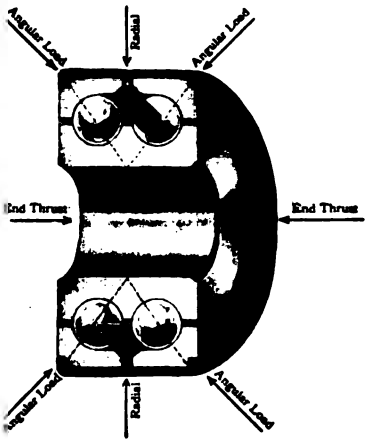
Complete stocks of New Departure, Timken and Hyatt Bearings are carried in every branch. This enables us to supply you with bearings for any make of motor car, truck or tractor ever manufactured—instantly.

## BEARINGS SERVICE COMPANY

*General Offices:* Detroit, Michigan

Digitized by Google

# Quality



## *The* DOUBLE ROW *Type.*

REMEMBER that the primary function of an anti-friction bearing is to prevent loss of power between rotating shafts and adjacent mechanism. If this were not so, the old practice of using plain bushings would be just as good.

Only that bearing is valuable which reduces frictional loss most completely.

The ball type does this most effectively.

The New Departure Double Row is the highest expression of the ball bearing for thrust and radial loads, since the angular contact of balls and races permits a free and true rolling motion at all times.

*No climbing of races due to centrifugal action. No wedging, no binding, no cramping.*

The New Departure Mfg. Company,
Bristol, Conn. 463 Detroit, Mich.

# Production Multiplied Over Seven Times

SRB

Single Row Double Row

## ANNULAR BALL BEARINGS

BY January, 1920, capacity of production of S. R. B. Ball Bearings will be seven times as great as in January, 1919, at which time production had been already restored to a normal and satisfactory basis after the curtailment of manufacture during the war.

STEP by step in anticipation of the fast mounting requirements of automobile, truck, tractor and other industries, S. R. B. production has been and is being aggressivly brought up, as results of improved facilities, plant extensions and increased equipment. All this with every care to maintain the quality which has made S. R. B. Bearings integral parts of those passenger and commercial vehicles and tractors whose names are instantly thought of as leaders in their respective fields.

IN view of the great proportions which the manufacture and sales of S. R. B. Bearings are assuming, it has been determined to combine the various properties engaged therein into a new company to be known as Standard Steel and Bearings Incorporated. This company consolidates into one operating unit the Braeburn Steel Company, Pittsburg, where all the High-Chrome-High-Carbon Steel for S. R. B. Bearings is made; the Standard Roller Bearing Company, Philadelphia, and the Plainville and other New England plants which are producing and being brought into production on S. R. B. Bearings.

**STANDARD STEEL AND BEARINGS Incorporated**

Standard Roller Bearing Company — Braeburn Steel Company

Owned and Operated by

**MARLIN-ROCKWELL CORPORATION**

Executive Offices:

347 MADISON AVE. NEW YORK

# Simplicity

Gurney Ball Bearings simplify machine design because both radial and thrust loads are carried on a single bearing, on a single row of balls.

The ability of Gurney Ball Bearings to carry loads up to 40 tons, or speeds up to 40,000 R.P.M. (but not of necessity on the same bearing) has been amply demonstrated.

They do it by reason of certain inherent qualities, the greatest number of balls of maximum size, and raceways properly fitted to the character of the service required.

Our Engineering Service Department, with its vast store of data, and its seventeen years of experience in the adaptation of ball bearings to a multitude of conditions, is at your service.

## GURNEY BALL BEARING COMPANY

***Conrad Patent License***

**JAMESTOWN, N. Y.**

### LIST OF GURNEY BALL BEARING DISTRIBUTORS

Reinhard Bros. Co., Inc., Minneapolis, Minn.

Geo. J. Silver, 1207 South Eighth East St., Salt Lake City, Utah.

Wm. Easy & Co., 38 Wentworth Ave., Sydney, Australia.

Foster Auto Supply Co., 138 16th St., Denver, Colo.

The Pruyn Co., 683 North Broad St., Philadelphia, Pa.

The Pruyn Co., 323 Highland Bldg., Pittsburgh, Pa.

The Bearings Co., 2204 Michigan Ave., Chicago, Ill.

Southern Bearing Co., 39 Luckie St., Atlanta, Ga.

R & L Bearings Co., 1790 Broadway, New York City.

R & L Bearings Co., 161 Massachusetts Ave., Boston, Mass.

Irvin Silverberg & Co., 541 Van Ness Ave., San Francisco, Cal.

Philip Gross Hardware Co., Milwaukee, Wis.

**DETROIT (Electric)**—1913 (Mods. 35, 36, 37, 39, 40 & 42)—(A) Tim, 342-3320; (B) Tim, 235-2320; (D & E) 210.
1914 (Mods. 46, 47, 48)—(A) Tim, 342-3320; (B) Tim, 235-2320; (D & E) Tim, 365-; 363; (I) 709U; (L) 209; (M) 307.

**DETROITER**—1917 (Mod. 6-45)—Tim. Brgs.; (A) 257-2520; )B) 235-2320; (D) 415T-412A; (A) Ann, 209; (G) 288-284; (H) 355-3520; (J) 334-3320; Ann, 207; • (K) 258-2520; Ann, 407; (O) Ann, 205; (BB) Ann, 307.

**DIAMOND ARROW**—1909-10—Tim. Brgs.; (A) 3357-3320; (B) 3151-3120; (D & E) 355-3520; (G & H) 375-3720; (J) 256-2520; (K) 337-3320.

**DIAMOND T**—1913 (Pleas.)—Tim. Brgs.; (A) 415-412; (B) 316-312; (D & E) 365-363; (G & H) 375-3720; (J) 256-2520; (K) 415-412; (AA) 337-3320; (BB) 335-3320 (DD & EE) 316-312.
1914 (J 1½ Ton)—Tim Brgs.; (A) 3750-3720; (B) 3360-3320; (D & E) 5553-5520; (G & H) 559-552; (J & K) 539-532; (AA & BB) 337-3320; (DD & EE) 335-3320.
1915 (J 1¼ Ton)—Tim. Brgs.; (A) 3750-3720; (B) 3360-3320; (D) 4553-4520; (E)

**DILE**—1915 (Mod. A)—(F) 306; (G & H) 207; (J) 0205; (K) 0206; (AA) 206; (BB) 205; (DD & EE) 205.

**DIXIE FLYER**—1917 (Flyer)—(D & E) Bower, 209AL: (G) Bower, 209A.

**DIXIE**—1916-17-18—(G & H) Hy, 26216.

**DISBROW**—1917 (Louis Disbrow)—(DD & EE) Hy, 17799.

**DOANE (Truck)**—1917 (2½-Ton)—Tim Brgs.; (A) 4550-4520; (B) 4361-4320; (D) 5550-5520; (E) 5351-5320; (G & H) 3955-3920; (J) 435-4320; (K) 336-3320; (AA) 337-3320; (BB, DD & EE) 335-3320.
1917 (6 Ton)—Tim. Brgs.; (A) 6356-6321; (B) 5355-5320; (D) 6550-6521; (E) 6354-6321; (G & H) 5756-5720; (J & K) 5356-5320; (AA & BB) 440-4320; (DD & EE) 415-412.

**DODGE (All Years)**—(A) Tim, 256-2530; (B) Tim, 1751-1730; (D & E) Tim, 288-284; (G & H) Tim, 365-363; (J) Tim, 255-2530; (K) Tim, 3191-3120; (O) 304; (Q) 304; (AA) 207; (BB) 308.

**DORRIS**—1912 (Mod. 35)—Tim. Brgs.; (A) 337-3 20; (B) 315-312; (D & E) 365363 (G & H) 375-3720; (J) 256-2520; (K) 415-412; AA & BB) 335-3320; (DD & EE) 316-312.
1912 (1-Ton Del.)—Tim. Brgs.; (A) 337-3320; (B) 315-312; (D & E) 365-363; (G) 375-3720; (H) 456-4520; (J) 336-3320; (K) 435-4320; (AA & BB) 335-3320; (DD & EE) 316-312.
1913-14 (Mods. 35, 1-14)—Tim. Brgs.; (A) 337-3320; (B) 315-312; (D & E) 365-363; (G) 375-3720; (H) 456-4520; (J) 317-312; (K) 440-4320; (AA & BB) 335-3320; (DD & EE) 316-312.
1913 (Lt. Del.)—Tim. Brgs.; (A) 337-3320; (B) 315-312; (D & E) 375-3720; (G) 456-4520; (H) 559-552; (J) 439-4320; (K) 539-532; (AA & BB) 335-3320; (DD & EE) 316-312.
1913 (1½ Ton)—Tim. Brgs.; (A) 3750-3720; (B) 3360-3320; (C) 341-3320; (D) 5563-5520; (E) 4365-4320; (G & H) 375-3720; (J) 256-2520; (K) 415-412; (AA & BB) 335-3320; (DD & EE) 316-312.
1914 (1-Ton Del.)—Tim. Brgs.; (A) 415-412; (B) 316-312; (D & E) 375-3720; (G) 456-454; (H) 559-552; (J) 439-4320; (K) 539-532; (AA & BB) 335-3320; (DD & EE) 316-312.
1914 (2-Ton)—Tim. Brgs.; (A) 4550-4520; (B) 4361-4320; (C) 443-4320; (D) 5550-5520; (E) 5355-5320; (G) 375-3720; (H) 395-3920; (AA & BB) 335-3320; (DD & EE) 316-312.
1915 (1-Ton Del.)—Tim. Brgs.; (A) 337-3320; (B) 315-312; (D & E) 375-3720; (G) 456-454; (H) 559-552; (J) 439-4230; (K) 539-532; (AA & BB) 335-3320; (DD & EE) 316-312.
1915 (1-A-4)—Tim. Brgs.; (A) 337-3320; (B) 315-312; (D & E) 365-363; (G) 375-3720; (H) 456-4520; (J) 317-312; (K) 440-4320; (AA & BB) 335-3320; (DD & EE) 316-312.
1915 (2-Ton)—Tim. Brgs.; (A) 4550-4520; (B) 4361-4320; (C) 443B-4320; (D) 5550-5520; (E) 5355-5320; (G & H)375-3720; (J) 256-2520; (K) 415-412; (AA & BB) 335-3320; (DD & EE) 316-312.
1916 (1-8-6) 1917 (1-B-6-¾ Ton)—Tim. Brgs.; (A) 415-412; (B) 316-312; (D & E) 365-363; (G) 375-3720; (H) 456-4520; (J) 317-312; (K) 440-4320; (Q) Ann, 1205; (AA) 337-3320; (BB) 335-3320; (DD & EE) 316-312. (Main Shaft Front on 1916 8-6) uses Tim, 335-3320.
1916-17 (I-B-W)—Tim. Brgs.; (A) 4558-4520; (B) 3360-3320; (C) 341B-3320; (D & E) 5553-5520; (G & H) 559C-552; (J & K) 539C-532; (Q) Ann, 1205; (AA & BB) 335-3320; (DD & EE) 316-312. 1917 Model uses Tim, 337-3320 on Main Shaft Front.

**DORT**—1915-16-17-18-19 (5-5A, 9, 11)—(D & E) Hy, 16395; (G & H) Hy, 162270 (J) Tim, 319-312; (K) Tim, 348-332; (AA) 207; (BB) 305.

**DREDNOT**—1914 (Mod. A-13)—Tim. Brgs.; (A) 5550-5520; (B) 5351-5320; (C) 5354-5320; (D) 6356-6321; (E) 5355-5320.
1915 (Mod. 9)—Tim. Brgs.; (A) 4550-4520; (B) 4361-4320; (C) 443B-4320; (D & E) 5553-5520; (G & H) 559C-552; (J & K) 539C-532.
1915 (Mod. G)—Tim. Brgs.; (A) 4558-4520; (B) 4360-4320; (C) 341B-3320; (D & E) 5553-5520; (G & H) 559C-552; (J & K) 539C-532.

**DREXEL**—1917 (Mod. R.)—(D & E) Bower, 208A.

**DRIGGS SEABURY**—1912-13 (4-5 Ton)—(D) Tim, 6451-6420; (E) Tim, 6354-6321.
1912-13-14 (2 Ton)—Tim. Brgs.; (A) 4550-4520; (B) 4364-4320; (D) 5554-5520; (E) 5355-5320.
1913-14 (3 Ton)—Tim. Brgs.; (A) 4550-4520; (B) 4364-4320; (D) 6358-6321; (E) 5565-5520.
1912-13 (7-Ton)—Tim. Brgs.; (A) 6452-6420; (B) 5355-5320; (D) 6552-6521; (E) 6350-6321.

**DUPLEX**—1916 (Mod. C-B)—(AA & BB) Tim, 357-353; (DD & EE) 339-333.
(2 Ton)—(A & D) Bower, 3762T: (B & E) Bower, 3362T: (G & H) Bower, 458T: (J) Bower, 4359T: (K) Bower, 335T.
(3-Ton)—(A) 311N; (B) 310N; (J) Bower, 355T; (K) Bower, 4359T.
1916 (Mod. D)—(A & D) Bower, 311N; (B & E) 310N; (G & H) Bower, 456T; (J) Bower, 335T; () Bower 4359T; (O) 205; Jack Shaft Hy, 19200.
1917 (Mod. E)—(A & D) Bower, 311N; (B & E) Bower, 310N; (G & H) Rower, 456T; (J) Bower, 335T; (K) Bower, 4359T; (O) ND. 205 Jack Shaft Hy, 19200.
1917 (Mod. EL)—(A & D) Rower, 311N; (B & E) Bower, 310N; (G & H) Bower. 456T; (J) Rower, 335T; (K) Bower, 4359T; Intermediate Rear Drive Shaft SK.F, 1309; (O) 205; Jack Shaft Hy, 19200.
1918-19 (Mod. E & EL)—(A & D) Bower, 311N; (B & E) Bower, 310N; (G & H) Bower 456T; (J) Tim, 335-3320; (K) Tim, 4368-4320; (O) 205, Chain Case Brgs. 2 Bowers 4355T, Jack Shaft Hy. 19200.
1918 (D 3½ Ton)—(A & D) Bower, 311N: (B & E) Bower, 310N: (G & H) Bower, 456T. (J) Bower, 4359T: (K) Bower, 335T: Jack Shaft, Bower, 310NDT

**DUROCAR**—1911 (Mod. D-30)—Tim. Brgs.; (A) 3357-3320; (B) 3151-3120; (D, E, G & H) 375-3720; (J) 336-3320; (K) 435-4320.
1911 (Mod. L-N)—Tim. Brgs.; (A) 2550-2520; (B) 2350-2320; (D & E) 415-412; (G & H) 375-3720; (J) 256-2520; (K) 337-3320.
1911 (Mod. 1-Ton)—Tim. Brgs.; (A & D) 3750-3720; (B & E) 3350-3320.

**EAGLE**—1917-18—(D & E) Hy, 16779: (G & H) Hy, 26056: (AA) Hy, 26518: (BB) Hy, 26737.

**ECLIPSE**—1912 (A 2-Ton)—Tim. Brgs.; (A) 4550-4520; (B) 4353-4320; (C) 443-4320; (D) 5563-5520; (E) 4365-4320.
1912 (D 3-Ton)—Tim. Brgs.; (A) 4550-4520; (B) 4353-4320; (C) 443-4320; (D) 6356-6321; (E) 5350-5320.
1912 (E 4-Ton)—Tim. Brgs.; (A) 5550-5520; (B) 5351-5320; (C) 5354-5320; (D) 6356-6221; (E) 5355-5320.

**ECONOMY**—1917 (Mods. 4-36)—(F) 309; (G & H) 0209; (J) 0207; (K) 0307; (Q) 205; (AA) 207; (BB) 305.
1917-18 (Mods. 8-48)—(F) 309; (G & H) 0209; (J) 0306; (K) 406; (Q) 205; (AA) 208; (BB) 307; (DD) 305; (EE) 306.

**EDWARDS-KNIGHT**—1913 (Mod. 25)—Tim. Brgs.; (A) 415-412; (B) 316-312; (D & E) 365-363; (G) 3 5-3720; (H) 456-4520; (J) 5356-5320; (K) 4364-4320; (AA) 337-3320; (BB) 335-3320; (DD & EE) 316-312.

**ELCAR**—1914 (Pleas.)—Tim. Brgs.; (AA) 337-3320; (BB, DD & EE) 335-3320.
1915 (Mod. 4-40)—Tim. Brgs.; (A) 415-412; (B, DD & EE) 316-312; (D & E) 365-363; (G) 375-3720; (H) 456-4520; (J) 317-312; (K) 440-4320; (AA) 337-3320; (BB) 335-3320.
1915 (Mod. 6-40)—Tim. Brgs.; (A) 337-3320; (B) 236-2330; (D) 435T-4320; (G) 375T-3720; (J) 255-2530; (K) 417-412; (AA) 277-274; (BB) 339-333.
1916 (Mod. 6-40)—Tim. Brgs.; (A) 337-3320; (B) 236-2330; (D) 435T-4320; (G & H 375T-3720; (J) 255-2530; (K) 417-412; (AA & BB) 335-3320; (DD & EE) 316-312.
1916 (Mod. A-B)—(D & E) Hy, 16076: (G & H) Hy, 26216.
1917-18—(G & H) Hy, 26216.
1917-18—(D & E) Bower, 208A.

**ELGIN**—1916-17 (Farm Tractor)—(D) Tim, 4554-4520; (E) Tim, 3362-3320.
1916 (Pleas.)—(D & E) 309; (F) 309; (G & H) 209; (J) Tim, 225; (K) 307; [use 306 & 406 with short third member]; (O) 203; (AA) 207; (BB) 306.

# Why Take Chances?

**As an expert mechanic—you know that carbon causes 98% of all engine trouble. You know also—that carbon is caused by leaky piston rings—which pump oil into the cylinders, where it does not belong. Lubricating oil does not explode—it burns—and forms carbon deposits. Carbon is an abrasive—like emery. If it is allowed to accumulate—it pits the valves and valve seats, produces abnormal wear of cylinders, pistons, piston rings and all engine bearings—causes faulty ignition, loss of compression and power—waste of gas and oil. In time it ruins the entire motor or makes regrinding and general overhauling absolutely necessary.**

# Install BURD Piston Rings

## *Approved by the World's Greatest Automotive Engineers*

**You can safely recommend BURD High Compression Piston Rings to your customers. They were selected for use in the Aviation Service—by the world's greatest automotive engineers—after the most rigid competitive tests. 16,000 Commissioned American Aviators, 5,000 Canadians and thousands of French and British Aviators learned to fly in planes equipped with BURD Piston Rings during the war, where efficiency was vital—because life was at stake.**

**BURD Piston Rings are easy to install—fit accurately to .00025 of an inch—are *guaranteed* against flaws and breakage—and warranted to produce higher compression and develop more power with less fuel and lubricating oil than any other piston ring made. The BURD Patented Guard Automatically Compensates for Wear and insures oil tight—gas tight—high compression—freedom from carbon trouble and a clean, economical, highly efficient engine.**

## Write for 1920 BURD Piston Ring Directory

**It gives complete piston ring information, sizes and oversizes for practically every make and model engine for automobiles, trucks, motor boats, tractors, etc., with instructions for installing and scores of helpful hints and suggestions for mechanics.**

## All Jobbers Carry Complete Stocks—To Fill Rush Orders

**Write to our Engineering Department for any information you want regarding special sizes or oversizes. This factory service is at your command—at any time—without charge.**

# JEFFERSON AUTOMOBILE IGNITION COILS

## Small Stock For Fitting All Cars

Because of flexible caps, terminals and brackets these coils are adapted to all ignition systems. You are required to carry only a very small stock. Consequently, your investment is unusually small and at the same time you can fit all makes of cars.

**JEFFERSON**

Coils are famous for their long life, dependability and uniformly high standard. Order your stock at once.

***Send for Coil List***

showing list of all cars that are Coil-Equipped and the types of Jefferson Coils and Brackets to be used as Replacements.

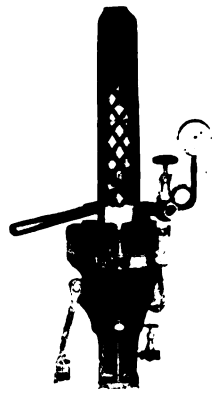
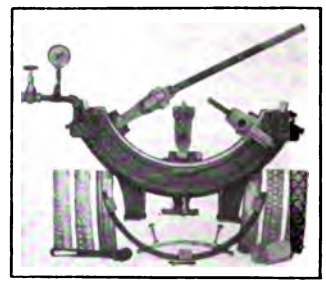
# Get This Retreading Outfit FREE

## NON-SKID RETREADING MOLDS



Two sizes of Molds in one set, curing all sizes from 28 x 3 to 37 x 5, inclusive, and producing seven beautiful treads, matching up the designs regardless of size of tire. If you want a perfect retreader

**HERE IT IS**



We are desirous of placing a few more Demonstrating Molds in established Vulcanizing Shops in the United States and Canada and offer a very attractive proposition to Vulcanizers who are willing to devote a small portion of their time to demonstrating and selling our equipment. Our commissions are high and a live demonstrator should do from ten thousand to twenty-five thousand dollars worth of business in the next twelve months. **THE AGENCY ALSO ENTITLES YOU TO A COMPLETE DEMONSTRATOR OUTFIT, WHICH BECOMES YOUR PROPERTY, WITHOUT COST,** after you have produced a certain amount of business. If interested, it is necessary that you communicate with us at once, using your business stationery, and we will mail you complete catalog, sample sections of Retreaded Tires and our proposition in full.

# GRANT SIX

## When you see the new Grant Six we are confident you will agree with those who declare it is the world's handsomest light six.

For it combines the smartness of an ultra fine sport model with the completeness and comfort of a roomy five passenger touring car. The long, low body lines suggest the strength, speed and easy riding qualities that are its characterisic features.

The chassis is of such high mechanical quality that it earns immediate distinction. The overhead valve motor will take the car as fast as most men dare to go. It is wonderfully flexible. We can say nothing in its praise that surpasses its performance, so we suggest that before you decide upon your line next season you make it your business to see the new Grant Six.

Equipment of this model is very complete and high grade.

There are four body styles: Five passenger touring car, $1495; three passenger roadster, $1495; four passenger coupe, $2450, and a five passenger, four-door, sedan, $2450; all prices f. o. b. Cleveland.

Write for literature giving full details of our proposition to dealers.

Dyneto
REGISTERED

# Starting & Lighting System Makes the Franklin Engine Non-Stallable

The Dyneto has been used on The Franklin Since 1913

The fear of a stalled engine in traffic jams or railroad crossings is banished forever from the mind of the Franklin Driver. Should the clutch be too suddenly applied or the engine's power fail for any other reason, the Dyneto Starter instantly takes hold with strength sufficient to move the car or start the engine again.

To one accustomed to starting and lighting systems, the extreme simplicity of the Dyneto makes an instant appeal.

Twenty passenger cars and trucks use the Dyneto single or two unit as standard equipment.

*Send drawings and specifications for our recommendation*

# PETRY CUT OUT

Pat. 2-6-17

## The Last Word in Muffler Cut-Outs

Expels the full exhaust to the rear—not down. Does not spatter mud and stir up dust. Has adjustable lever, making attaching easy, positive cut off from the muffler. Spring away from heat, and easily adjustable, compound lever action and spring makes action smooth and easy on pedal. Valve seat and valve machined to prevent leakage. A scientifically designed mechanical job. Neat in appearance, strong in construction, thoroughly serviceable. Size plainly cast on each side. Invaluable for "tuning up" the motor.

**Sizes—1½" to 3¼"**
**Prices—$4.50 to $6.00**

**N. A. PETRY COMPANY, INC.**
**1306 Race St., Philadelphia**

**DISTRIBUTORS**

*An Explanation of* **VAN BRIGGLE CARBURETORS** *The Airplane Principle*

A THOROUGH examination of the Van Briggle principle of Carburetion will show that it follows simple, natural laws in its functioning, and contains nothing mysterious or complex. ¶ To illustrate its simplicity, examine the cross-section above. Note the path of the inrushing air. You see that it strikes directly upon the lip of the nozzle on the inlet side.

***Motor speed automatically controls fuel consumption***

The velocity of this air has direct control over the amount of gasoline coming *out* of the nozzle. When speed is increased, the increased velocity of air, beating against the gasoline nozzle, retards the flow of gasoline. So the proportion of air and gasoline is instantly corrected to obtain the most power with economy, at any engine speed, under all variations of load, road or weather.

When the air strikes the top of the nozzle, it throws the gasoline in a fan-shaped spray toward the outlet side of the mixing chamber. Then the air which has passed on down and turned up toward the outlet rushes up through this spray and reduces it to a swirling vapor, which enters the cylinders almost as evenly as natural gas.

***Power, Economy, Dependability***

The perfect mixing of air and gasoline, to a near-natural gas consistency — gives the power, the freedom from trouble, which Van Briggle owners praise.

**The Van Briggle Airplane Principle Carburetor is simple, understandable. So much so that a Van Briggle user KNOWS, when his motor troubles or fails him, that his Van Briggle Carburetor is NOT at fault.**

Ask your dealer or garageman today for a Van Briggle Airplane Principle Carburetor. For either cars or trucks, in the following models: Dodge, $18; Maxwell, $15; Ford, $10. Complete, ready to install.

**Shock Absorbers *for* Ford Cars**

SAVES strain on motor and car-frame; reduces up-keep, makes riding more enjoyable. Adds to length of service; increases resale value. Makes easier driving.

Does not crimp or bind springs. The rebound is caught by the reverse movement of the shock absorber. Installed without removing wheels or changing anything. Price Complete Set, ready for installation: $18

Van Briggle Carburetors and Van Briggle Shock Absorbers are sold to dealers through bona fide automobile accessory jobbers.

# SERVICE STATION AND GARAGE
# ELECTRICAL EQUIPMENT

## SHURO CELL TESTER

Locates accurately and quickly trouble in each individual cell without removing battery from any car. Can be held in any position. Shuro is constructed with a combination meter and a light which will enable the novice as well as the expert to take an accurate reading. Whenever trouble exists this instrument operates in such a way that owners realize that the battery should be cared for immediately by recharging, repairing or replacement.

**HOW SHURO WORKS**

First: It draws approximately the same amount of current from one cell at a time as the cell would normally be required to furnish when operating the self-starter.

Second: It registers both the amount of current and cell voltage at the same time, by a single indicator rotating over a double scale.

Third: Either terminal of SHURO is Positive or Negative.

Fourth: A low voltage pilot light visualizes the condition of each cell to the non-technical battery owner. This instrument is sturdily built of gray fibre board and steel, the lamp and the meter are amply protected and will stand rough usage.

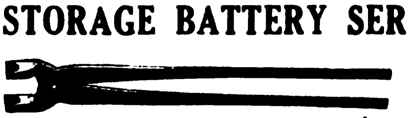
**H. B. No. 355 Price, complete, $17.00**
**H. B. No. 356 Price, without voltmeter, $8.50**

## STEEL WIRE SCRATCH BRUSHES

**H. B. No. 353X 1784.** 2 rows, length of wire 1⅛ inches, length of brush part 5¼ inches. **Price, 40c**

**H. B. No. 354X 1781.** 4 rows, length of wire 1⅛ inches, length of brush part, 5¼ inches. **Price, 50c**

## STORAGE BATTERY SERVICE TOOLS



**For removing the terminals on Storage Batteries**

**17½ Inches**

This tong eliminates the necessity of pounding on the terminal heads to remove the taper connections.

The method of operating is to back the binding nut out about two threads and apply the tong, the forked jaw over the cable end of the taper plug and the flat or cupped jaw on the binding nut. In this position the taper plug can be easily pressed out no matter how badly corroded.

**H. B. No. 348. Price ........................................ $1.65**

## SHONTZ BATTERY CLIPS

H. B. No. 377. 35 Ampere. Spread of Jaws 1½ in.

For use as a quick and ready means of connecting Storage Batteries for Charging. Lead-plated to resist acid fumes.

Enable you to charge lighting and starter batteries without disconnecting them or removing them from the car.

Don't stop to clean dirty terminals—the teeth bite through the corrosion and make a good contact.

| Net Prices | | Shipping Weight | |
|---|---|---|---|
| Less than 10, each | $0.20 | Each | 2 oz. |
| Box of 10, each | .15 | Each | 20 oz. |
| Box of 100, each | .12½ | Each | 13 lbs. |

## SHONTZ UNIVERSAL REPLACEMENT TERMINALS

Universal replacement Battery Terminals simplify the temporary installation of batteries on cars using different types and arrangements of terminals.

These replacement terminals clamp on the terminal posts of the battery in any position. Made of Brass and are Lead-plated. Can also be used with yoke terminals.

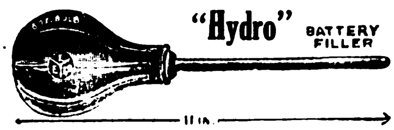
Terminals used with stud type terminal links will bolt readily to flat surfaces on the top of the replacement terminal links.

For replacing batteries having cables permanently attached, adapters are used with replacement terminals, consisting of the proper length of cable soldered into large taper plugs.

RENTAL BATTERIES equipped with these universal replacements can be readily connected to any type of terminals which may be on the car wiring, making a neat and satisfactory connection without loss of time.

**H. B. No. 342. Price, Positive—Negative, each .................. List, $1.15**

## "Hydro" BATTERY FILLER



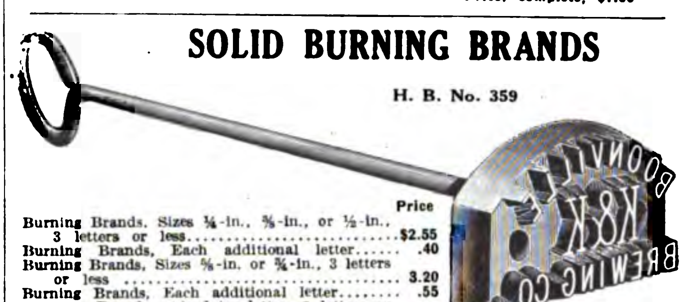
This **Battery Filler** is a well known device, in big demand among Garages, and is used for handling distilled water. It is very handy for re-filling Storage Batteries. The length of this instrument over all is 11 inches—weight ½-lb.

The bulb has a capacity of 8 ozs. and is made of very heavy Black Rubber. The stem is made of Hard Rubber.

**H. B. No. 365**
**Price, complete, $1.00**

## SOLID BURNING BRANDS

H. B. No. 359



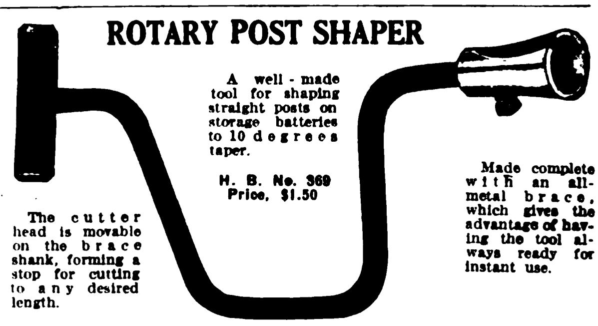
| | Price |
|---|---|
| Burning Brands, Sizes ¼-in., ⅜-in., or ½-in., 3 letters or less | $2.55 |
| Burning Brands, Each additional letter | .40 |
| Burning Brands, Sizes ⅝-in. or ¾-in., 3 letters or less | 3.20 |
| Burning Brands, Each additional letter | .55 |
| Burining Brands, side 1-in. letter, 3 letters or less | 3.85 |
| Burning Brands, Each additional letter | .65 |
| Punctuation Marks, each | .20 |

These brands are solid and consequently give no trouble from the letters getting loose or falling out, and can also be made in two or more lines; with curved lines 25 per cent. extra.

**For Copper Brands Add 60 Per Cent.**

Prices quoted on brands in larger sizes or special designs.

## ROTARY POST SHAPER



A well-made tool for shaping straight posts on storage batteries to 10 degrees taper.

**H. B. No. 369**
**Price, $1.50**

The cutter head is movable on the brace shank, forming a stop for cutting to any desired length.

Made complete with an all-metal brace, which gives the advantage of having the tool always ready for instant use.

## SHONTZ BATTERY POST BUILDERS

Made of steel for building up POSITIVE or NEGATIVE, TAPERED or STRAIGHT posts. When ordering do not fail to mention the kind wanted.

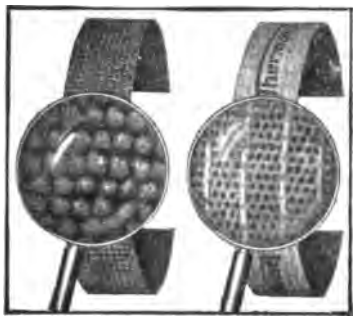
# The biggest year in the brake lining business



**Ordinary Woven Lining**

*Notice the loosely woven texture.*

*Wears down quickly and unevenly.*

*Loses its gripping power as it wears.*

**Thermoid Hydraulic Compressed Brake Lining**

*Notice the compact texture. Wears down slowly. Gives uniform gripping surface until worn wafer thin.*

### *How much of the 53,000,000 feet of brake lining needed for 1919 did you sell?*

IN 1918 there was one automobile for every 18 persons in America.

In 1919 there were over 6,000,000 cars and trucks which had been in service for over one year.

1920 promises to be the biggest year in the history of the automobile industry.

If 53,000,000 feet of brake lining were needed in 1919—dealers can appreciate the phenomenal sales that 1920 will offer.

### *The national brake inspection movement*

With the increase of motor vehicles and the increasing traffic and safety problems that are confronting the country, the necessity of brake legislation is emphasized.

Police chiefs in towns of 2500 population and over, are supporting the movement for efficient brakes.

Newspapers everywhere are urging motorists to be sure of their brakes. The Thermoid Chart of Stopping Distances, now the Police Traffic Regulation Chart, is being given widespread notice by police chiefs as well as by automobile officials.

### *Dealers should capitalize this movement*

Good brakes are dependent upon the most efficient brake lining—car owners appreciating the imperative need of safe brakes are bound to have their brakes inspected—and relined if necessary.

There is a big business ahead for all Thermoid dealers, because Thermoid is the one brake lining that is tied up to the brake inspection movement. It is the one and only brake lining that assures satisfaction to both dealer and customer.

Get your share of this profitable trade. Thermoid is the best known and fastest selling brake lining there is. It will build permanent good-will for you by giving your customers lasting service.

### *The famous Thermoid guarantee*

Every foot of Thermoid Brake Lining is backed by our *guarantee: Thermoid will make good—or* WE WILL.

# Make Your Ford a Ton Truck for $8

Your Ford used as passenger car or truck—can't be loaded with more than 800 pounds without inviting disaster.

That's because the load is all supported at just one point on the spring. Overloading pounds the axle bearings, shears off center bolts, makes fenders rub on tires and damage them — in fact ruins the car in short order.

**But—you can safely double your loads at a cost of but $8.00 by equipping your car with a set of Dottl Spring and Frame Supports. These supports—installed in 30 minutes, without drilling holes in springs or frame—will distribute the strain of the load so that it's supported at three points, instead of one, and enable your car to carry a ton of passengers or freight—without danger or damage.**

Made in two models—for old and new style Ford rear springs
Price $8.00 per Set; In Canada, $10.00
Distributed by leading jobbers
**Sold by live dealers**

# Wainwright Perfected Light Weight Grey Iron Pistons Now Carried in Stock for Prompt Shipment . . . .

In addition to supplying the most prominent motor car manufacturers, for the past fifteen years, with WAINWRIGHT PISTONS, for use in production of new cars, we are now prepared to make prompt shipment of WAINWRIGHT PERFECTED LIGHT WEIGHT GREY IRON PISTONS to replace those made of heavy cast iron, or to take the place of inefficient, troublesome, aluminum pistons of improper design, which have not given satisfactory service.

WAINWRIGHT GREY IRON PISTONS, in many cases, weigh no more than the aluminum and have proven their superiority in thousands of automobiles by transforming a wheezing, weak, unsatisfactory motor, with knocks and slaps, into a powerful, quiet-running car that will stand the hardest kind of driving.

Write us about your piston problems and experience.

We maintain a complete stock and prompt service.

# SHALER 5 MINUTE VULCANIZER

## The Easy Way to Mend Tubes

The Shaler makes perfect tube repairs in 5 minutes. Works automatically — without fail. Burns non-flaming chemical fuel. Makes a permanent "feather-edge" repair, stronger than any "stuck on" patch. Cannot injure tubes. Fits tool box. Saves tubes — saves repair bills.

**COMPLETE OUTFIT $1.50 — AT ALL DEALERS**

Price slightly higher west of the Rockies and in Canada. The outfit includes: the vulcanizer, 12 patch and heat units, 6 round for punctures, and 6 oblong for cuts. Extra patch and heat units — round or oblong, 75 cents a dozen.

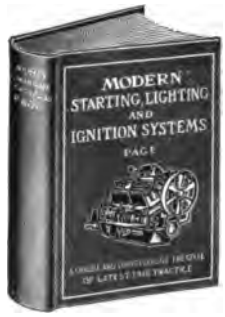
# Starting, Lighting and Ignition Systems



By VICTOR W. PAGE. A practical treatise on modern starting and ignition system practice, written with special reference to the requirements of the nontechnical reader desiring easily understood explanatory matter relating to all types of automobile ignition, starting and lighting systems.

All the leading systems of starting, lighting and ignition have been described and illustrated with the cooperation of the experts employed by the manufacturers. Wiring diagrams are shown in both technical and nontechnical forms. All symbols are fully explained. Complete data is given for locating troubles in all systems. All ignition systems receive full consideration, starting with the simplest battery and coil forms found on early cars to the modern short-contact timer and magneto methods used with the latest eight and twelve-cylinder motors. This book is unusually complete, as it also includes descriptions of various accessories operated by electric current, such as electrical gear shifts, brake actuation, signaling devices, vulcanizers, etc. Nearly 500 pages. 297 specially made engravings. New Edition. Price, $2.00.

# *Taxicabs* use WEED TIRE CHAINS

***Because they can't afford to take chances and because, with Weed Chains, they get greater mileage out of their tires.***

It's a business proposition, pure and simple, with taxicab companies. They use Weed Chains for economy and accident insurance.

The *main* incentive for the use of Weed Chains is the accident-preventing feature—a most important factor as it means the saving of lives and property.

But further than that it is known from bitter and costly experience that the continual, constant and yet hardly perceptible slipping of the rubber tire-surface on wet roads and pavements—only the foot or so of lost traction at a time—is an alarming expense item—wearing out tires just the same as if you pressed them against a rapidly revolving grindstone.

Taxicab companies have learned from experience that *only by the use of Weed Chains* can this continuous wear on tires be prevented. Their drivers *are ordered* to put on their Weed Chains "at the first drop of rain" because of the thousands upon thousands of dollars that are thus actually saved every year in tire service and the elimination of skidding accidents. Wouldn't it be well for you to learn wisdom from the fellow who really knows?

***Be as wise as the taxi driver and always put on your Weed Chains "at the first drop of rain."***

Weed Chains are also made to meet the demand for an efficient traction and anti-skid device for trucks equipped with single and dual solid tires or with the very large pneumatic tires. They are so constructed that they satisfactorily meet the requirements of heavy truck service in mud, sand or snow.

## AMERICAN CHAIN COMPANY, Inc.

BRIDGEPORT A·C·C CONNECTICUT

In Canada: Dominion Chain Company, Limited, Niagara Falls, Ontario

## Largest Chain Manufacturers in the World

The Complete Chain Line—All Types, All Sizes, All Finishes—From Plumbers' Safety Chain to Ships' Anchor Chain

General Sales Office: Grand Central Terminal, New York City

District Sales Offices: Boston, Chicago, Philadelphia, Pittsburg, Portland, Ore., San Francisco

***The above is one of a series of Weed Tire Chain advertisements*** **appearing in magazines with a combined circulation of over 5,000,000. Send a postcard to the American Chain Company for advertising material for your counter and windows; also for the names and addresses of the nearest jobbers in your vicinity who stock Weed Tire Chains.**

Overland 4

TRADE MARK REG.

THE Three-Point Suspension Springs of Overland 4 make rough roads seem smoother.

They lessen jolt and jar. By protecting car and mechanism from road shocks they reduce upkeep expense.

They make Overland 4 a *more comfortable* car to ride in and a *more economical* car to own.
